Syn. — BECAUSE, FOR, SINCE, AS, INASMUCH AS. BECAUSE assigns a cause or reason immediately and explicitly; as, I hid myself, *because* [i. e., for the express reason that, or, as caused to do so by the fact that] I was afraid; he must have passed this way, *because* [i. e., owing to the specific fact that] there is no other road; cf., he must have passed this way, *because* [i. e., as is directly proved by the fact that] his footprints are here. FOR, in modern usage, is a particle of less immediate reference than *because;* it regards the statement to which it is subjoined as relatively independent, and proceeds to adduce for it some ground, reason, evidence, proof, explanation, or justification; as, I hid myself, *for* [i. e., as I may add by way of explanation] I was afraid; he must have passed this way, *for* [i. e., as you may readily see] here are his footprints, I like him, *for* [i. e., I ask, in justification of the fact] why can help it? SINCE (originally denoting sequence in time) is less formal and more incidental than *because;* AS assigns a reason even more casually than *since;* each of them frequently begins its sentence; as, *Since* (or *as*) I was afraid, I hid myself; I will come, *since* you ask me; *as* I knew him to be out of town, I did not call. INASMUCH AS assigns a reason in a somewhat concessive or qualified fashion; as, *Inasmuch as* [i. e., in view of, or considering, the fact that] I was afraid, I hid myself; I am ready to accept your proposal, *inasmuch as* [i. e., seeing that] I believe it is the best you can offer. See THEREFORE.

Ir. *beach,* Lith. *bitis,* and perh. to G. *beben* to tremble, Skr. *bhī* to fear.] **1.** Any insect of the order Hymenoptera and superfamily Apoidea. They differ from the wasps in the habit of storing up the pollen of flowers for food, and often also honey, instead of provisioning their nests with spiders, or other insects. Many of them are of solitary habits; others, as the honeybee, form colonies having a high degree of organization. The bees have usually been divided into two families, the *Apidæ,* comprising the *honeybees, carpenter bees, bumblebees,* etc., and the *Andrenidæ* or solitary bees, which are mostly of burrowing habits. (See these terms.) Recent classifications divide them into a larger number of families. Aside from their usefulness as producers of honey and wax, bees are of the greatest service in securing the cross pollination of flowers, by means of the pollen which they carry from flower to flower clinging to the hairs on their bodies and legs. Without this means of transporting the pollen, many plants would not mature seed.

Syn. — Crave, solicit, petition, pray. — BEG, BESEECH, ENTREAT, IMPLORE, SUPPLICATE, IMPORTUNE agree in the idea of urgent asking. To BEG (see ASK) is to ask earnestly, as a favor; BESEECH implies still greater solicitude or eagerness; as, "On my knees I *beg* that you 'll vouchsafe me raiment, bed, and food" (*Shak.*), "I *beseech* you therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice" (*Rom.* XII. 1). To ENTREAT is urgently to solicit or petition; as, "Praying us with much *entreaty* that we would receive the gift" (2 *Cor.* VIII. 4). IMPLORE implies either increased fervor of entreaty, or greater humility, or both; as, "Very frankly he confessed his treasons, *implored* your highness' pardon, and set forth a deep repentance" (*Shak.*). SUPPLICATE expresses extreme, sometimes even desperate, urgency of entreaty, and implies still greater humility; as, "I have attempted, one by one, the lords, either at home, or through the high street passing, with *supplication* prone and father's tears, to accept of ransom for my son" (*Milton*). To IMPORTUNE is to solicit persistently, often with the implication of wearisome pertinacity; as, "there with my cries *importune* Heaven" (*Milton*). See LONG, DESIRE, CONJURE, PRAYER.

to beg off, to obtain release for, through entreaty. — **I beg to,** is an elliptical expression for *I beg leave to*; as, *I beg to* inform you. — **to beg the question.** See PETITIO PRINCIPII. — **begging the question.** *Logic.* = PETITIO PRINCIPII.

be′ing (bē′ĭng), *p. pr. & p. a.* of BE. Existing.

☞ *Being* was formerly used where we now use *having*. "*Being* to go to a ball in a few days." *Miss Edgeworth.*

☞ In modern usage, *is, are, was*, or *were being*, with a past participle following (as *built, made*, etc.) indicates the process toward the completed result expressed by the participle. The earlier form *is*, or *was, building*, etc., is an idiom the original form of which was *is*, or *was, a-building* or *in building*, where *building* is the gerund or verbal noun. The idiom *is*, or *was, building*, etc., is still in elegant use, but on account of its frequent ambiguity the later idiom is now generally used in its stead.

A man who is *being* strangled. *Lamb.*

While the article on Burns *was being* written. *Froude*

Fresh experience is always *being* gained *Jowett* (*Thucyd.*).

be′ing, *n.* **1.** Existence, as opposed to nonexistence, specif., life; conscious existence, lifetime; mortal existence.

In Him we live, and move, and have our *being Acts* xvii 28

All the current of my *being* sets to thee. *Tennyson.*

Claudius, thou

Wast follower of his fortunes in his *being*. *Webster* (1654).

2. Existence in relation to a specified place or condition; as, my *being* there was a mere chance.

3. Station in life; standing; place. *Obs.*

4. That which exists; specif., **a** With various qualifying adjectives, as supreme, infinite, etc.: God. **b** A human being; a person.

The *being* he loved best in all the world. *Tennyson.*

5. *Philos.* **a** That which is more abstract and has less intention than existence, nonexistence, or any other predicate; — in this sense used especially by Hegelians.

Pure *being* is the empty absolute *W. T. Harris*

b That which exists whether actually or potentially, that which has or may have reality.

I am speaking all through of *being* as it is for knowledge; not of the ontological, and, to my mind, fruitless question, how *being* can be apart from a consciousness. *B. Bosanquet.*

c That which exists as an actuality or entity in time or space, in idea or matter.

Being originally the present participle of a verb which in one of its meanings is exactly equivalent to the verb exists; and therefore suitable, even by its grammatical formation, to be the concrete of the abstract existence. *J. S. Mill.*

6. Livelihood; living; also, abode; home. *Obs. or Dial.*

It was a relief to dismiss them [Sir Roger's servants] into little *beings* within my manor *Steele.*

be′ing, *conj.* [Prop., p. pr.] Since. *Obs. or Colloq.*

Bel′i (bĕl′ī), *n.* See BELINUS.

"wickedness," and secondarily "destruction." Usually in the Old Testament it is used with another word, as *daughter, thing, man, son*, etc., and rendered literally as "Belial;" as "sons of Belial," as if a proper name, in both the Authorized and Revised Versions, the margin in the latter giving variant renderings such as "base fellows," "wicked woman," "wicked men," etc. In the later Jewish literature and in the New Testament the name became identified with *Satan* as meaning the spirit of evil or lawlessness.

What concord hath Christ with *Belial*? *2 Cor* vi 15.

2. In Milton's "Paradise Lost," one of the fallen angels.

a son, *or* **man, of Belial,** a worthless, wicked, or thoroughly depraved person; a base fellow.

Now the sons of Eli were *sons of Belial* [R. V. margin, wicked men]; they knew not the Lord. *1 Sam.* ii 12

The *sons of Belial* had a glorious time *Dryden.*

Syn. — See MISREPRESENT.

be-lief' (bē-lēf'), *n.* [ME. *bileafe, bileve;* cf. AS. *geléafa.* See BELIEVE.] **1.** A state or habit of mind in which trust, confidence, or reliance is placed in some person or thing; trust; confidence; faith.

2. *Theol.* A persuasion of the truths of religion; faith; specif., *R. C. Ch.*, assent to a revealed truth on the authority of God, who revealed it.

3. Conviction or feeling of the truth of some proposition or the reality of some being or phenomenon, esp. such conviction when it comes after doubt as to the truth or reality of the thing believed in; reflective assurance.

Belief admits of all degrees, from the slightest suspicion to the fullest assurance. *Reid.*

The perception of truth or falsehood; which I apprehend to be exactly the meaning of an act of *belief*, as distinguished from simple conception. *J. S. Mill*

We ought first to notice that the use of the word *belief* in our language is changing: formerly it denoted something taken as definite and certain on the basis of some external authority; now it has grown rather to denote credit given to a statement on a more or less sufficient balancing of probabilities. *Karl Pearson.*

4. Immediate assurance or feeling of the reality of something; as, *belief* in sensation; *belief* in one's own activity.

In its inner nature, *belief*, or the sense of reality, is a sort of feeling more allied to the emotions than to anything else. *Wm. James.*

5. The thing believed; the object of belief; specif., a tenet, or the body of tenets, held by the advocates of any class of views; doctrine; creed.

Superstitious prophecies are not only the *belief* of fools, but the talk sometimes of wise men. *Bacon.*

6. *Eccl.* A statement of doctrines believed; a creed; specif. [*cap.*], the Apostles' Creed. *Archaic.*

Syn. — Assent, credence, assurance, confidence, trust, reliance. — BELIEF, FAITH, PERSUASION, CONVICTION agree in the idea of assent. BELIEF and FAITH, in modern usage, differ chiefly in that *belief*, as a rule, suggests little more than intellectual assent; *faith* implies in addition the element of trust or confidence (cf. "*belief* in God" with "*faith* in God"); as, "One in whom *persuasion* and *belief* had ripened into *faith*." (*Wordsworth*). A PERSUASION is an assured opinion, as, "It was the avowed opinion and *persuasion* of Callimachus . . . that Homer was very imperfectly understood even in his day" (*Cowper*). PERSUASION (see INDUCE) sometimes implies that this assurance is induced by one's feelings or wishes, rather than by argument or evidence; CONVICTION, on the other hand, stands for a fixed and settled belief; as, "His *belief* is likely to have been *persuasion* rather than *conviction*" (*Carlyle*). See TRUST, CREDENCE, OPINION, IDEA; cf. CONFIDENCE.

be-liev'a-ble (bē-lēv'ȧ-b'l), *a.* See -ABLE; BELIEVE. — **be-liev'a-ble-ness, be-liev'a-bil'i-ty** (-bīl'ĭ-tĭ), *n.*

Bellerophon, 2 (*B. sublævis*) (⅔)

‖ **belles'-let'tres** (bĕl'lĕt'r', 277), *n. pl.* [F.] Polite or elegant literature, — formerly sometimes used as equiv. to the humanities, but now applied somewhat vaguely to literary works in which imagination and taste are predominant.

Syn. — See LITERATURE.

bel'le-tris'tic (bĕl'lē-trĭs'tĭk), *a.* Of or pertaining to belles-lettres. *M. Arnold.*

bell'-faced' (bĕl'fāst'), *a.* Having the striking surface convex; — said of hammers.

bell'house' (bĕl'hous'), *n.* **1.** A structure for containing a bell or bells, as (properly) a detached building, or (by extension) any belfry. **2.** *Archæol.* A kind of ancient round tower, as in Ireland, probably connected with uses of defense.

bel'li-cose (bĕl'ĭ-kōs; bĕl'ĭ-kōs'; 277), *a.* [L. *bellicosus*, fr. *bellicus* of war, fr. *bellum* war. See DUEL.] Inclined to contention; warlike; pugnacious. — **bel'li-cose'ly,** *adv.*

Arnold was, in fact, in a *bellicose* vein. *Irving.*

Syn. — See BELLIGERENT.

bel'lied (bĕl'ĭd), *a.* Having a belly, or (such) a belly; specif., big-bellied, corpulent, fig., inflated; puffed out; bulging; — esp. in comb., as, pot-*bellied*, shad-*bellied*.

bel-lig'er-ence (bĕ-lĭj'ĕr-ĕns) } *n.* Quality of being bel-
bel-lig'er-en-cy (-lĭj'ĕr-ĕn-sĭ) } ligerent; status of a belligerent; act or state of waging war; warfare.

bel-lig'er-ent (-ĕnt), *a.* [L. *belligerans*, p. pr. of *belligerare* to wage war, fr. *belliger* waging war; *bellum* war + *gerere* to wage. See BELLICOSE, JEST.] **1.** Waging war; carrying on war. When a colony, a province, or a revolutionary party or section is engaged in waging war against its general government, it has no standing in international law until it is recognized as belligerent by neutral powers. Such recognition protects it by, and subjects it to, the laws of war. It cannot be so recognized until it is maintaining an independent *de facto* government.

2. Pertaining or tending to war; warlike; of or relating to belligerents; as, a *belligerent* tone; *belligerent* rights.

Syn. — Warlike, hostile; irascible, choleric; disputatious, wrangling. — BELLIGERENT, BELLICOSE, PUGNACIOUS, QUARRELSOME, CONTENTIOUS, LITIGIOUS agree in the idea of aptness to contend. That is BELLIGERENT which is of a warlike character or actually engaged in hostilities; that is BELLICOSE which is inclined to fight; as, a *belligerent* gesture, the *belligerent* powers; a *bellicose* mood, in a *bellicose* vein. PUGNACIOUS differs from *bellicose* (which is sometimes given a semihumorous or mock-heroic turn) in applying more commonly to disposition or character; it does not convey the impression of pettiness or ill-nature implied in QUARRELSOME; as, "The Scotch are certainly a most *pugnacious* people; their whole history proves it" (*G. Borrow*); "The snake, though high-spirited, is not *quarrelsome;* he considers his fangs to be given for defense, and not for annoyance" (*Sidney Smith*). CONTENTIOUS frequently suggests a certain perversity of temper and wearisome persistence in dispute; as, "A continual dropping in a very rainy day and a *contentious* woman are alike" (*Prov.* xxvii. 15). LITIGIOUS is now commonly confined to fondness for legal contention; as, a *litigious* client; "If the spirit be not tamed and broken by these happy methods, it is stubborn and *litigious*" (*Burke*). See MARTIAL, DISPUTE, CONTENTION; cf. ANGRY.

bel-lig'er-ent (bĕ-lĭj'ĕr-ĕnt), *n.* A belligerent nation, state, or person.

bel-lip'o-tent (bĕ-lĭp'ō-tĕnt), *a.* [L. *bellipotens; bellum* war + *potens* powerful.] Mighty in war. *Rare.*

bell'-mouthed' (-mouthd'; -moutht'), *a.* Flaring at the mouth; as, a *bell-mouthed* gun. *Byron.*

Bel-lo'na (bĕ-lō'nȧ), *n.* [L., fr. *bellum* war.] *Rom. Relig.* Goddess of war, closely associated with Mars. Before her temple, which stood near the Circus Maximus, was the **Columna Bellica**, from which, when war was declared, a bloody spear was cast into a neighboring plat, feignedly foreign territory. A second *Bellona*, with whom the first became identified, was the Cappadocian **Mâ** or **Mâ-Bellona**, whose priests, **Bel'lo-na'ri-i** (bĕl'ō-nā'rĭ-ī), danced frenziedly and gashed themselves in order to read the future. Bellona was also identified with the Greek *Enyo.*

bel'low (bĕl'ō), *v. i.*; BEL'LOWED (-ōd); BEL'LOW-ING. [ME. *belwen, belowen*, AS. *bylgean;* prob. akin to AS. *bellan*, G. *bellen*, Lith. *balsas* voice, Skr. *bhash* to bellow. Cf. Syn. — BELOW, UNDER, BENEATH, in their literal senses, indicate lower position relatively to some other object or place. BELOW (opposed to *above*, which see) applies to that which is anywhere in a lower plane than the object of reference; UNDER (opposed to *over*; see ABOVE), to that which is below in a relatively vertical line, it sometimes implies actual covering; as, *below* sea level, the valley far *below* us; *under* a tree, *under* the bed; to hide one's light *under* a bushel; the Whirlpool Rapids are *below*, the Cave of the Winds is *under*, Niagara Falls; the whole visible landscape is *below*, but only a small portion of it *under*, an observer in a balloon. BENEATH is a somewhat literary equivalent of both *below* and (esp.) *under*; as, "heaven above, or . . . the earth *beneath*" (*Ex.* xx. 4); "*beneath* the spreading tree" (*Goldsmith*). In their figurative senses, BELOW and UNDER agree in expressing inferiority, but differ (like *above* and *over*) in the immediacy of the relation expressed; thus, one officer may be *below* another in rank, without being *under* him in immediate subordination. Similarly, with reference to deficiency, *below* is commonly used in general, *under* in more specific, relations; as, a gold dollar weighing *under* 25.8 grams is *below* the standard; *under* six years of age, *below* the average. BENEATH frequently suggests unworthiness or lack of desert; as, to marry *beneath* one, *beneath* one's notice, *beneath* contempt.

Syn. — Profit, service, use, avail.

benefit of clergy, *Law*, the privilege, claimed by the medieval church, of demanding a trial and punishment by an ecclesiastical court (which could not inflict the death penalty) when accused of crime before a temporal court. On the Continent this privilege was very generally allowed; and in England at the time of the Norman Conquest it was allowed to clerks in orders accused of a felony, except high treason. The privilege was extended by degrees to all who could read, and by 6 Anne, *c.* 9 (1706), to all, without reference to the ability to read. The trial (by compurgation) and punishment became a scandal because of their laxity, and the privilege was abridged, until its final abolishment in 1827 by the Criminal Law Act (7 & 8 Geo. IV. *c.* 28, s. 6). — **benefit of inventory**, *Law*, in the Civil law, and formerly in Scots law, the privilege secured by an heir who rendered a formal inventory of his ancestor's estate upon making entry within the *annus deliberandi*. 7. Specif., extent of tension or flexure that a bow is capable of; hence, power of endurance; capacity; — now used only in the phrase "to the top of one's *bent*," or the like

They tool me to the top of my *bent* *Shak.*

8. A carpenter's or wood carver's gouge or V tool which is abruptly curved in the length.

Bent, 8.

9. *Arch.* A framed section pieced together on the ground and afterwards raised to its final (vertical) position.

Syn. — Turn, inclination, leaning, tendency, disposition, predisposition, prepossession, penchant, prejudice. — BENT, BIAS, PROCLIVITY, PROPENSITY, PRONENESS agree in the idea of a strong, often innate, tendency or disposition. BENT, the widest term, denotes a fixed tendency of the mind or character in a given direction; BIAS applies particularly to the judgment, through which it is regarded as acting with permanent force upon the character; as, a *bent* toward mathematics, reflection, the *bias* of early education, of class prejudice. *Bent* is more frequently native, *bias* oftener acquired, as, "the proper *bent* of his genius" (*Spectator*); "the *bias* of thought . . . given by a training in the Roman law" (*Sir H. Maine*). PROCLIVITY denotes a tendency of more compelling force than *bent*; PROPENSITY usually adds to *proclivity* the implication of fondness or appetite; both *proclivity* and *propensity* are frequently used of a faulty or excessive tendency, as, a *proclivity* to steal; "such vehement *propensities* as drove Romeo, Antony, Coriolanus, to their doom" (*A. C. Bradley*). PRONENESS suggests evil as the end toward which inclination tends; as, *proneness* to self-indulgence. See PREDILECTION, TURN, TENDENCY, VEIN, GIFT.

The *bent* of his mind, which was at all times much to metaphysical theology, had here been fixed in thus direction. *Wordsworth.*

Though it be difficult to resist the mechanic impulse and *bias* of our own temper, it is yet possible. *T. Gray*

Proclivity to sin, through a being given up to hardness of heart. *J. Edwards*

There is a *propensity* belonging to common house cats that is very remarkable; I mean their violent fondness for fish.
Gilbert White.

And this declining *proneness* unto naught,
Is e'en that sin that we are born withal. *Sir J. Davies.*

bent, *n.* [AS. *beonet;* akin to OHG. *pinuz*, G. *binse*, rush, bent grass; of unknown origin.] **1.** A reedlike grass; a stalk of stiff, coarse grass; a grasslike reed; — also used collectively in *sing.*

ben'zal (bĕn'zăl), *n.* [*benzo-* + *aldehyde.*] *Chem.* The bivalent radical $C_6H_5·CH$, of which benzoic aldehyde may be regarded as the oxide; — called also *benzylidene.*

benzal chloride. A colorless liquid, $C_6H_5CHCl_2$, manufactured from the toluene of coal tar, and used in the production of artificial dyes.

ben-zal'de-hyde (bĕn-zăl'dē-hīd), *n.* [*benzo-* + *aldehyde.*] *Chem.* Benzoic aldehyde.

ben'zal-dox'ime (bĕn'zăl-dŏk'sĭm ; -sēm), *n.* [*benzaldehyde* + *oxime.*] *Org. Chem.* Either of two isomeric crystalline compounds, $C_6H_5CH{:}N·OH$, oximes of benzaldehyde. The existence of two compounds of this formula is explained by assuming a difference in *spatial* arrangement (see ANTI- **d**, SYN-):

"Anti-" form: C_6H_5CH / HO-N "Syn-" form: C_6H_5CH / N-OH

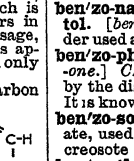
ben'za-mide (bĕn'zā-mīd ; -mĭd ; 184), *n.* [*benzoic* + *amide.*] *Chem.* The amide of benzoic acid, $C_6H_5CONH_2$, a white crystalline substance obtained by the action of ammonia on benzoyl chloride and by other methods.

ben'ze-in (bĕn'zē-ĭn), *n. Chem.* Any of a class of carbinols derived from triphenyl methane, in which two benzene nuclei are hydroxylated. They are generally red-colored, with metallic luster.

ben'zene (bĕn'zēn; bĕn-zēn'), *n.* [From BENZOIN.] *Chem.* A volatile and inflammable hydrocarbon, C_6H_6, formed by distilling benzoic acid with lime, and by the action of heat on various organic substances. It is a colorless liquid of ethereal odor, boiling at 80.4° C., and burning with a luminous flame. It is obtained commercially from the destructive distillation of coal, and is used as an illummant in gas, as a solvent for fats and resins, as a material in the manufacture of dyes, etc. In chemistry it is important as the type of a large number of substances called the aromatic compounds. See BENZENE NUCLEUS.

☞ The early name was *benzine*, given by Mitscherlich; this was superseded by Liebig's name, *benzol*, which is still retained in common use in German, and occurs in English to a certain extent. According to the best usage, however, the form *benzene*, suggested by Hofmann, is applied to the compound, the name *benzol* being applied only to a commercial mixture of aromatic hydrocarbons.

benzene nucleus *or* **ring.** *Chem.* A ring of six carbon atoms believed to exist in all the so-called "aromatic" compounds. (See BENZENE.) The six atoms are united in some way, not well understood, which gives distinctive properties to compounds containing the ring. In the case of benzene, the simplest aromatic compound, six hydrogen atoms are attached to the ring (see *Illust.*); substitution of one or more of these by other atoms or groups gives the various benzene derivatives. The ring being symmetrical, there is but one variety of each mono-substitution product. Of every di-substitution product there are three possible varieties, in which the carbon atoms in union with the substituting atoms or groups are, respectively, adjacent, separated by another carbon atom, or opposite, in the ring. These three positions are known respectively as the ortho (*o*), meta (*m*), and para (*p*) positions. Tri-substitution products all of whose groups are alike are called *vicinal* or *consecutive* (*v*) when all three groups are adjacent, *asymmetrical* or *irregular* (*a*) when two are adjacent, and *symmetrical* (*s*) when all three are separated. For convenience in designating derivatives in general, the six carbon atoms of benzene are numbered from 1 to 6 in order around the ring. Thus, *m*-dinitrobenzene or 1,3-dinitrobenzene is understood to mean benzene in which two hydrogen atoms in the meta relation have been replaced by two nitro groups.



Benzene Nucleus (Kekulé's Formula).

benzene series. *Chem.* A series of liquid and solid hydrocarbons containing the benzene nucleus, of which benzene is the simplest member. Several occur in coal tar.

ben'zi-dine (bĕn'zĭ-dĭn ; -dēn; 184), *n.* [From BENZINE.] *Org. Chem.* A basic substance, $(C_6H_5NH_2)_2$, prepared by a series of reactions from nitrobenzene, and crystallizing in silvery scales. It is much used in preparing the **benzidine colors or dyes** (see CONGO GROUP).

ben'zil (bĕn'zĭl), *n.* [From BENZOIN.] *Chem.* A yellowish crystalline substance, $C_6H_5·CO·CO·C_6H_5$, formed from benzoin by the action of oxidizing agents, and consisting of a doubled benzoyl radical.

ben-zil'ic (bĕn-zĭl'ĭk), *a. Org. Chem.* Pertaining to or designating a white, crystalline acid, $(C_6H_5)_2C(OH)CO_2H$, obtained by warming benzyl with alcohol and caustic potash. It is a diphenyl derivative of glycolic acid.

ben'zine (bĕn'zĭn; -zēn; 184), *n.* **1.** See BENZENE, *Note. Rare.* **2. a** A volatile inflammable liquid derived from petroleum and used, on account of its solvent power, in cleaning, dyeing, painting, etc. See PETROLEUM, *Table.* **b** An inflammable liquid obtained in the distillation of coal tar, and used as a solvent for resins, as a cleaning agent, etc. It contains xylenes, cumene, and other hydrocarbons.

ben'zo-, benz-. *Org. Chem.* Combining forms denoting *relation to benzene*, or the *presence of the benzene nucleus.*

ben'zo-ate (bĕn'zō-āt), *n.* A salt or ester of benzoic acid.

ben'zo-at'ed (bĕn'zō-āt'ĕd), *p. a.* **a** Mixed or treated with benzoic acid. **b** = BENZOINATED.

ben'zo-gly-ox'a-line (-glĭ-ŏk'sa-lĭn; -lēn; 184), *n.* Also **-lin.** *Chem.* Any of a class of compounds containing the glyoxaline ring in union with the benzene ring, the simplest member having the formula $C_7H_6N_2$; — called also *benzimidazole.*

ben-zo'ic (bĕn-zō'ĭk), *a.* Pert. to, or obtained from, benzoin.

benzoic acid, $C_6H_5·CO_2H$, an acid crystallizing in the form of light, white, satiny flakes. It occurs in benzoin and other resins and in cranberries, and (combined) in the urine of herbivorous animals; but commercially it is prepared chiefly from toluene. It finds considerable use in medicine and in color manufacture. Called also *flowers of benzoin.* — **b. aldehyde,** the aldehyde, $C_6H_5·CHO$, intermediate in composition between benzyl alcohol and benzoic acid; oil of bitter almonds. It is a thin colorless liquid, used in making dyes and other organic substances.

ben'zo-in (bĕn'zō-ĭn ; -zoin), *n.* [Cf. F. *benjoin*, Sp. *benjuí*, Pg. *beijoin;* all fr. Ar. *lubân-jâwî* incense from Sumatra (named Java in Arabic), the first syllable being lost. Cf. BENJAMIN.] **1.** A balsamic resin obtained from *Styrax benzoin*, a tree of Malacca, Sumatra, and Java, and possibly from other species of *Styrax.* It has a fragrant odor and aromatic taste, and is used in making benzoic acid, as a stimulant and expectorant, and as a perfume and incense. Called also *gum benzoin*, *benjamin*, and *gum benjamin.*

2. [*cap.*] *Bot.* A small genus of aromatic lauraceous shrubs or rarely trees, native of eastern North America and eastern Asia. *B. benzoin* and *B. melissæfolium* are the two North American species, the former being known as the *spicebush*, *spicewood*, or *benjamin bush.* Also [*l. c.*], a plant of this genus.

3. *Chem.* A white crystalline substance, $C_{14}H_{12}O_2$, obtained from oil of bitter almonds and some other sources.

ben'zo-in-at'ed (bĕn'zō-ĭ-nāt'ĕd), *p. a. Pharm.* Containing or impregnated with benzoin; as, *benzoinated* lard.

ben'zol (bĕn'zōl; bĕn'zŏl), *n.* Also **ben'zole.** [*benzo-* + 2d *-ol.*] *Chem.* **a** Benzene. See BENZENE, *Note.* **b** A mixture of hydrocarbons of the benzene series, obtained in the refinement of coal tar. It is used as a solvent and cleaning agent, in color manufacture, etc. The two principal varieties are known as (1) "ninety per cent benzol," which actually contains about 70 per cent benzene, 24 per cent toluene, and 6 per cent xylene, carbon disulphide, and other substances; (2) "fifty per cent benzol," containing relatively more toluene and xylene, and almost no carbon disulphide.

ben'zo-lat'ed (-lāt'ĕd), *p. a. Pharm.* Mixed, treated, or combined with benzol or benzene, or some derivative thereof.

ben'zo-naph'thol (-năf'thōl ; -thŏl), *n.* Also **ben'zo-naph'tol.** [*benzo-* + *naphthol.*] *Chem.* A white crystalline powder used as an intestinal antiseptic; beta-naphthol benzoate.

ben'zo-phe'none (-fē'nōn), *n.* [*benzo-* + *phenol* + 1st *-one.*] *Chem.* A crystalline ketone, $C_6H_5COC_6H_5$, produced by the distillation of calcium benzoate and in other ways. It is known in two modifications, stable and unstable (labile).

ben'zo-sol (bĕn'zō-sōl ; -sŏl), *n. Pharm.* Guaiacol benzoate, used as an intestinal antiseptic and as a substitute for creosote in phthisis. It is a colorless crystalline powder.

ben'zo-thi'a-zole (-thī'ă-zōl), *n.* [*benzo-* + *thiazole.*] *Org. Chem.* Any of a class of feeble bases containing the benzene ring in union with the thiazole ring, the simplest member having the formula C_7H_5NS.

ben'zo-thi'o-phene (-ō-fēn), *n.* [*benzo-* + *thiophene.*] *Org. Chem.* A compound, $C_6H_4{<}CH{:}CH{>}S$, containing a benzene ring and a thiophene ring in union; — called also *thionaphthene.* It is a solid melting at 31° C., with an odor like naphthalene, and has a large number of derivatives.

ben'zo-tri-chlo'ride (-trī-klō'rīd ; -rĭd ; 184), *n.* [*benzo-* + *trichloride.*] *Chem.* A highly refracting liquid, $C_6H_5·CCl_3$, obtained by the action of chlorine on toluene. It is used in the manufacture of dyes and other substances.

ben-zox'a-zole (bĕn-zŏk'sā-zōl), *n.* [*benzo-* + *oxazole.*] *Chem.* Any of a class of feeble bases containing the benzene ring in union with the oxazole ring, the simplest member having the formula C_7H_5ON. Some are used as dyes.

ben'zo-yl (bĕn'zō-ĭl), *n.* [*benzo-* + *-yl.*] *Chem.* A univalent radical, C_6H_5CO, known only in combination. It is called the radical of benzoic acid, that acid being the hydroxide, $C_6H_5CO·OH$, of the radical. Benzoyl chloride, $C_6H_5CO·Cl$, and benzaldehyde or benzoyl hydride, $C_6H_5CO·H$, are also well-known compounds. The series of *benzoyl* compounds was the first of its kind to be clearly un-

Be'o-wulf (bā'ō-wo͝olf), *n.* A prince, and later king, of the Geatas, the hero of an Anglo-Saxon epic poem of the same name, preserved in a MS. of the 10th century. In the hall of Hrothgar, king of the Danes, he tears out an arm of the man-devouring monster Grendel, who dies in the fens ; and in a cavern under water he slays Grendel's revenging mother. When old he rids his country of a treasure-guarding dragon, receiving from it his death wound.

be-paint' (bē-pānt'), *v. t.* To smear or cover with paint ; to paint ; hence, to tinge ; color.

Else would a maiden blush *bepaint* my cheek. *Shak.*

be-queath' (bē-kwēth'), *v. t.*; BE-QUEATHED' (bē-kwēthd') ; BE-QUEATH'ING. [ME. *biquethen*, AS. *becweðan* to say, affirm, bequeath ; *be-* + *cweðan* to say. See QUOTH.]

1. To appoint, give, or transfer by formal declaration ; to transfer or deliver (property) so as to pass at once. *Obs.*

Wilt thou forsake thy fortune,
Bequeath thy land to him and follow me? *Shak.*

2. To give or leave by will ; to give by testament. It has often been decided in modern legal cases that in gifts by will *bequeath* and *bequest* are the more appropriate words for use in making a gift of personalty and *devise* the more appropriate word for a gift of realty. This distinction, however, is modern and not everywhere observed ; and in any case *bequeath* will operate to convey realty and *devise* to convey personalty where this is shown to be the intent with which the words were used. There is, moreover, no reason for such a distinction in the history of the words. Both were originally used without distinction to give either personalty or realty, *bequeath* and *bequest* being the earlier English words, in addition to which *devise*, *v.*, came into use from the French, towards the end of the 14th century, apparently, and *devise*, *n.*, in the 16th century, with the same meanings as *bequeath* and *bequest*. Subsequent attempts to discriminate between them have caused the modern efforts to restrict the one to personalty and the other to realty.

My heritage, which my dead father did *bequeath* to me. *Shak.*

3. To hand down ; to transmit.

To *bequeath* posterity somewhat to remember it. *Glanvill.*

4. To give ; offer ; commit ; commend. *Obs. or Archaic.*

To whom, with all submission, on my knee
I do *bequeath* my faithful services. *Shak.*

be-quest' (bē-kwĕst'), *n.* [ME. *biquest*, corrupted fr. *biquide* ; *be-* + AS. *cwiðe* a saying, fr. *cweðan* to say ; cf. also AS. *cwe* a saying. The ending *-est* is perh. due to confusion with *quest*. See BEQUEATH, QUEST.] Act of bequeathing, or leaving by will ; also, that which is left by will, esp. personal property ; a legacy.

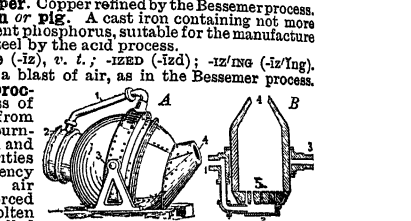
Bessemer process. A process of making steel from cast iron by burning out carbon and other impurities through the agency of a blast of air which is forced through the molten metal; — so called from Sir Henry Bessemer, an English engineer, who invented it. Also, the process of refining copper matte by burning out the sulphur in a similar way. In steel making the blowing is usually continued till all the carbon is removed, and the desired proportion is restored, together with manganese, by adding ferromanganese or spiegeleisen. The metal is then poured into a large ladle, from which the ingot molds are filled. The Bessemer process is either *acid* or *basic* according to the nature of the refractory lining of the *converter*, or vessel in which the blowing is conducted. See IRON, BASIC PROCESS.



Converters used in Bessemer Process.

5. In point of comparison of; — used of two or more persons or things; as, to judge *between* or to choose *between* courses, to distinguish *between* you and me.

Between two gulfs, which hath the merriest eye. *Shak.*

6. In intermediate relation to, in respect of time, quantity, quality, or degree; as, *between* nine and ten o'clock.

Syn. — BETWEEN, AMONG. BETWEEN, in its literal sense (see etym.), applies to only two objects; as, *between* Scylla and Charybdis, *between* two fires. When used of more than two objects, it brings them severally and individually into the relation expressed, as, a treaty *between* three powers, the three survivors had but one pair of shoes *between* them; "I . . . hope that *between* public business, improving studies, and domestic pleasures, neither melancholy nor caprice will find any place for entrance" (*Johnson*) AMONG always implies more than two objects, which it brings less definitely into the relation expressed; as, *among* so many candidates one must find a good one; *among* the survivors were two children; "Five barley loaves, and two small fishes: but what are they *among* so many?" (*John* vi. 9). See AMONG.

between ourselves, b. you and me, b. themselves, in confidence: with the understanding that secrecy is to be maintained. — **b. wind and water**, *Naut.*, about at the water line, so as often to be alternately above and below water, esp. with reference to injuries.

2. [*cap.*] The BOOK, by way of eminence; — i. e., the book made up of the writings accepted by Christians as inspired by God and of divine authority; the Scriptures of the Old and New Testaments; sometimes in a restricted sense, the Old Testament. Also, the book made up of writings similarly accepted by the Jews; as, a rabbinical *Bible,* i. e., a Bible with the notes of the rabbins. NO MANUSCRIPT of the Old Testament in the original Hebrew antedates the 9th century, and none of the New in the Greek is earlier than the 4th; but critics are certain that we have the text of the 1st century substantially intact. The origin of the customary DIVISION INTO CHAPTERS (formerly attributed to Hugues de St. Cher and dated about 1262) is now dated about 1200 and assigned to Stephen Langton, later Archbishop of Canterbury, and the numbering of verses to Robert Stephen's Greek Testament, 1551 (an adaptation of the system of Rabbi Isaac Nathan, in his Hebrew Concordance, 1437–47; published, Venice, 1523).

The Bible as a whole was known to the Middle Ages in the Western Church through the *Vulgate.* Versions (translations) in vernacular, often constituted the earliest or most important literary monuments, as of Gothic, Basque, and Slavonic. Among partial versions, or more properly paraphrases, in Anglo-Saxon are the **Cædmonian poems** and several renderings of the Gospels. The first complete translation into English was made from the Vulgate by Wycliffe about 1382, and revised by John Purvey about 1388. During the Renaissance editions of the Bible in the original Hebrew and Greek afforded a broader textual basis, on which William **Tyndale** founded his version of the New Testament (Worms, 1525–26), the Pentateuch, and other parts of the Old Testament. Miles **Coverdale,** who may have been one of his assistants, published the first complete English Bible in 1535. **Luther's Bible** (which see) was completed about the same time. Subsequent important English versions and editions are: *Matthew's Bible,* 1537; *Great Bible,* 1539; *Cranmer's Bible,* 1540; *Geneva Bible,* 1560; *Bishops' Bible,* 1568; *Authorized Version,* or *King James Bible,* 1604–11; *Rheims N. T.,* 1582; *Douay Bible,* 1609–10; *Revised Version,* 1881, 1885; *American Revised Version,* 1901. These are treated in the general Vocabulary. Various ancient versions, as the *Targums, Septuagint,* and *Peshitta,* have been used as aids toward reëstablishing the original text. For ancient texts, see CODEX. For the contents, see OLD TESTAMENT, NEW TESTAMENT. See also TRADITION, APOCRYPHA, CANON, etc.

There are many other editions, or names for editions, the chief importance of which is due to some special circumstance, such as a mistake or peculiarity in printing or translation. Many of these, with the passage or fact from which the names arose, are here given: **Adulterous Bible.** = WICKED BIBLE, below. — **Berlsburg Bible,** a German translation (1720–42), with mystical tendencies, based partly on Luther's version, partly on the Zurich Bible. — **Bible of Fer-ra'ra** (fẽr-ra'ra), 1553, the first edition of the Old Testament in Spanish, by Duarte (Edward) Pinel, made directly from the Hebrew expressly for the Jews. Another edition was prepared for the Christians and issued there in the same year. — **Bible of 42 lines.** See MAZARIN BIBLE, below. — **Bible of 36 lines,** a folio edition of the Biblia Latina (the second Latin edition) with pages of two columns having 36 lines; and *Pfister's Bible,* because printed by Albert Pfister. — ‖ **Bi'blī-a del O'so** (bē-blē-ä dĕl ō'sō) [Sp., Bible of the Bear], the first published (1569) Spanish translation of the whole Bible, so called from the bear which appeared as the frontispiece, done by Cassiodoro de Reyna. It was published at Basel. — **Breeches Bible,** the Geneva Bible, 1560, reading in Gen. iii. 7, "They sewed fig leaves together and made themselves *breeches* [aprons]." — **Bug Bible** (1551), reading in Psalm xci. 5, "So that thou shalt not need to be afraid for any *bugges* [terrors] by night" The same expression is found in Coverdale and Taverner. — **Chained Bible,** the Great Bible, which was often chained in churches for public reading. — **Discharge Bible** (1833), reading 1 Timothy v. 21, "I *discharge* [charge] thee before God" — **Ears-to-ear Bible** (1810), reading in Matthew xi. 15, "He that hath ears to hear, let him hear." — **He Bible,** the translation (1611) in the King James Bible, having a certain phrase (Ruth iii. 15), "*he* went into the city" instead of "*she* went into the city," as in the subsequent editions. The Revised Version also gives "he." — **Kralitz, or Brothers' Bible,** the most important Bohemian version, published in six volumes at Kralitz in Moravia (1579–93), and so named in allusion to the work of the United Brethren upon it. — **Leopolita Bible,** a Polish translation (1561), made by John of Lemberg (*Leopolis* in the Latin form), published at Cracow. It is based on the Vulgate and was intended for Roman Catholic use, but was not sanctioned by the Pope. — **Mazarin Bible.** Also *Bible of 42 lines,* or *Gutenberg Bible.* An edition of the Vulgate printed at Mentz, about 1450–55, by Gutenberg and others, which was the first Bible, and probably the first complete book, printed with movable metal type. — so called from its being found about 1760 in the library of Mazarin. — **Murderer's Bible** (about 1801), reading in Jude 16, "These are *murderers* [murmurers]." — **Old Cracow Bible,** the Leopolita Bible. — **Ostrog Bible,** the first complete Bible printed in Slavonic, — so called from Ostrog, where it was printed in 1581. — **Placemaker's Bible** (about 1562), reading in Matt v. 9, "Blessed are the *placemakers* [peacemakers]" — **Printer's Bible** (about 1702), reading in Psalm cxix. 161, "Printers [princes] have persecuted me without a cause." — **Probe-bibel,** or **Proof Bible,** the first impression of Luther's German Bible, as revised by order of the Eisenach German Protestant Church Congress, of which the final revised edition appeared in 1892. — **Rebekah's-camels Bible** (1823), reading in Genesis xxiv. 61, "And Rebekah arose, and her *camels* [damsels]" — **Rosin Bible,** the Douay Bible of 1609, having in Jeremiah viii. 22, "Is there no rosin [balm] in Galaad [Gilead]?" — **Septemberbibel,** Luther's translation of the New Testament which appeared in September, 1522, at Wittenberg, without any date or name of the publisher on the title-page. — **She Bible,** the edition (1611) correcting the supposed error of the "He Bible." — **Standing Fishes' Bible** (1806), reading in Ezek. xlvii. 10, "The *fishers* [fishers] shall stand upon it." — **Taverner's Bible,** a revision (1539) of Matthew's Bible, made by Richard Taverner (d. 1575). — **Thumb Bible** (Aberdeen, about 1607), about the size of the thumb, one inch square and half an inch thick. — **To-remain Bible** (Bible Society at Cambridge, 1805), having the words "to remain" inserted in Gal. iv. 29 instead of a comma. — **Treacle Bible,** a Bishops' Bible (1568), reading in Jeremiah viii. 22, "Is there no treacle [treacle] in Gilead?" ["Is there no balm in Gilead?"] — **Vinegar Bible** (Clarendon Press, Oxford, 1717), having the title "Parable of the Vinegar [Vineyard]," over Luke xx. — **Wenzel Bible,** or **St. Wenceslaus Bible,** a Roman Catholic edition in Bohemian edited by Jesuits (1677–1715) and published at Prague; — so called because published at the expense of the society named after this saint. — **Wertheim Bible,** a German rationalistic version of 1735, published at Wertheim. — **Wiesbater Bible** (1890), reading in Luke xiv. 26, "If any man come to me and hate not his father . . . yea, and *his own wife also.*" — **Wicked Bible,** or **Adulterous Bible** (1631), having in the seventh commandment (Ex. xx. 14) printed "Thou shalt commit adultery." — **Wuyeck's,** or **Wujek's, Bible,** the Authorized Polish Roman Catholic version of the Bible, made by the Jesuit Jacob Wujek (d. 1593) and published at Cracow, N. T. 1593, O. T. 1599. — **Zurich Bible,** a German version of 1530, chiefly Luther's translation with the addition of translation of the Prophets and Apocrypha.

bil'liards (bĭl'yärdz), *n.* [F. *billard* billiards, OF. *billart* staff, cue for playing, fr. *bille* log. See BILLET a stick.] Any of several games played on an oblong table, surrounded by an elastic ledge or cushions, with balls which are impelled by a cue. In most games three balls are now used, a red, plain white, and spot white. In the English game the standard table is twelve by six feet and has six pockets, the balls are $2\frac{1}{2}$ inches in diameter, and points are scored by caroms and by winning and losing hazards. In the American or French game the standard table is ten by five feet and is without pockets, the balls are $2\frac{3}{8}$ inches in diameter, and points are scored by caroms only. Smaller tables are often used. In the balk-line game chalk lines are drawn parallel to and at a certain distance, usually 14 or 18 inches, from each cushion. If the two object balls rest in one of the resulting rectangles (except the center one) at least one object ball must be driven out at the second shot (two shots in) or at each shot (one shot in). The *sing* form, **billiard**, is used attributively, as in **billiard ball, billiard cue, billiard table**, etc.

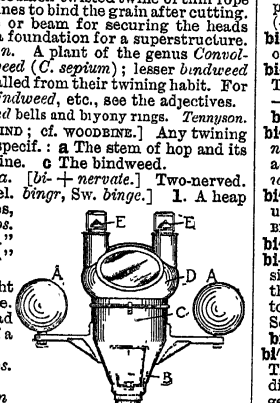
3. State of being bound.
4. That which is bound; bundle; bunch. *Obs. Wycliffe.*
binding course. *Masonry.* A row as of bricks set across an inner and an outer course to bind them together.
binding post. *Elec.* A metallic post attached to electrical apparatus for convenience in making connections.
binding rafter. A longitudinal timber, as a purlin, between the plate and ridge of a roof, to support rafters.
binding screw. A set screw used to bind parts together, esp. one for making a connection in an electrical circuit.
binding twine. A coarse slack-twisted twine or thin rope used in harvesting machines to bind the grain after cutting.
bind rail. *Engin.* A tie or beam for securing the heads of piles, and serving as a foundation for a superstructure.

bind'weed' (bīnd'wēd'), *n.* A plant of the genus *Convolvulus*; as, greater *bindweed* (*C. sepium*); lesser *bindweed* (*C. arvensis*), etc.;—so called from their twining habit. For *black bindweed*, *rough bindweed*, etc., see the adjectives.
The fragile *bindweed* bells and bryony rings. *Tennyson.*

bine (bīn), *n.* [Var. of BIND; cf. WOODBINE.] Any twining stem, or flexible shoot; specif.: **a** The stem of hop and its varieties. **b** The woodbine. **c** The bindweed.

bi-nerv'ate (bī-nûr'vāt), *a.* [*bi-* + *nervate*.] Two-nerved.

bing (bĭng), *n.* [Cf. Icel. *bingr*, Sw. *binge*.] **1.** A heap or pile, as of ore, stones, earth, grain, wood. *Obs. or Dial.* "Potato *bings*." *Burns.* "A *bing* of corn." *Surrey.*
2. **a** *Mining.* (1) Eight hundredweight of lead ore. (2) The best quality of lead ore. *Eng.* **b** The kiln of a smelter. *Obs.*
3. = BIN, a receptacle. *Obs. or Dial.*



Binnacle. *A A* Quadrantal Spheres; *B* Magnet Chamber; *C* Compass Chamber; *D* Hood; *E E* Lamps.

bin'na-cle, **bin'o-cle** (bĭn'ă-k'l), *n.* [For earlier *bittacle*, corrupted (perh. by influence of *bin*) fr. Pg. *bitacola* binnacle, fr. L. *habitaculum* dwelling place, fr. *habitare* to dwell. See HABIT.] *Naut.* A case, box, or stand containing a ship's compass, and a lamp for use at night.

bin'na-cle, **bin'o-cle** (bĭn'ŏ-k'l), *n.* [Prob. fr. D. *binnen* within, inner, and *kul* channel (see KILL).] A subdivision of the main stream of a river, as a mill pond, a mill race, or a secondary channel. *Local, U. S.*

bin'ny (bĭn'ĭ), *n.*; *pl.* BINNIES (-ĭz). A large barbel (*Barbus bynni*), of the Nile. It is esteemed for food.

bi'no-cle (bī'nŏ-k'l), *n.* [F. *binocle*; L. *bini* two at a time + *oculus* eye.] *Optics.* A binocular telescope; a double-barreled field glass or an opera glass.

bin-oc'u-lar (bĭn-ŏk'ū-lẽr; bī-nŏk'-; 277), *a.* [Cf. F. *binoculaire*. See BINOCLE.] **1.** Having two eyes. *Obs.*
2. Pertaining to both eyes; employing both eyes at once; as, *binocular* vision. Also, adapted to the use of both eyes; as, a *binocular* microscope or telescope.
binocular parallax, the apparent difference in position of an object as seen separately by one eye, and then by the other, the head remaining unmoved. It is the same as the angle (sometimes called the *optic angle*) between the optic axes of the two eyes when directed to the same point.
— **bin-oc'u-lar'i-ty** (-lăr'ĭ-tĭ), *n.* — **bin-oc'u-lar-ly**, *adv.*

bin-oc'u-lar, *n.* A binocular glass, whether opera glass, telescope, or microscope.

bi-nod'al (bī-nōd'ăl), *a.* [*bi-* + *nodal*.] Consisting of, or having, two nodes; as, a *binodal* stem of a plant; a *binodal* quartic, a curve of the fourth order with two double points.

bi'node' (bī'nōd'), *n.* [*bi-* + *node*.] *Math.* A point on a surface at which there are two tangent planes.

bi-no'mi-al (bī-nō'mĭ-ăl), *a.* Consisting of two terms; pertaining to binomials, as, a *binomial* root.
binomial coefficient, the coefficient of any term resulting from the expansion of the binomial $(x+y)^n$. — **b. equation**, *Math.*, an equation having two terms, as $ax^m = by^n$. — **b. nomenclature**, *Biol.*, the system of nomenclature in which each species receives two names, the first being that of the genus to which it belongs, the second that of the species itself. This system, which is now the accepted one for animals and plants, was first standardized by Linnæus, though binary names had been used occasionally by pre-Linnæan writers. Also called *binary nomenclature*. See NOMENCLATURE. — **b. theorem**, *Alg.*, the theorem propounded by Sir Isaac Newton by means of which a binomial may be raised to any power without performing the multiplications. According to it,

$$(x+y)^n = x^n + nx^{n-1}y + \frac{n(n-1)}{1.2}x^{n-2}y^2 + \frac{n(n-1)(n-2)}{1.2.3}x^{n-3}y^3 + \ldots$$

The development, when convergent, is valid for any value of *n*.

bi-no'mi-al, *n.* [L. *bi-* + *nomen* name: cf. F. *binôme*, LL. *binomius* (or fr. *bi-* + Gr. νομή distribution?). Cf. MONOMIAL.] **1.** *Alg.* An expression consisting of two terms connected by the sign plus (+) or minus (−), as $a+b$ or $7-3$.
2. *Biol.* A name consisting of two terms, as *Ranunculus acris*. See BINOMIAL NOMENCLATURE.

bi-no'mi-al-ism (-ĭz'm), *n. Biol.* The theory or use of the binomial system of nomenclature. See under BINOMIAL.

bi-nor'mal (bī-nôr'măl), *n. Math.* With relation to a twisted curve, the normal perpendicular to the osculating plane.

bin-ox'a-late (bĭn-ŏk'să-lāt; bī-nŏk'-), *n.* [*bin-* + *oxalate*.] *Chem.* An acid oxalate formed from oxalic acid by the replacement of half the acid hydrogen; as, potassium *binoxalate*, KHC_2O_4.

bi-nu'cle-ar (bī-nū'klē-ẽr) } *a.* [*bi-* + *nuclear*, *nucleate*.]
bi-nu'cle-ate (-nū'klē-āt) } Having two nuclei.
bi-nu'cle-at'ed (-āt'ĕd) }

bi'o- (bī'ŏ-). A combining form from Greek βίος, *life*, used to indicate *relation to*, or *connection with*, *life*, *vital phenomena*, or *living organisms*; as, *bio*blast, *bio*dynamics, etc.

bi'o-blast (bī'ŏ-blăst), *n.* [*bio-* + *-blast*.] *Biol.* **a** A bioplasm; a cell. *Obs.* — **bi'o-blas'tic** (-blăs'tĭk), *a. Obs.*

bi-oc'el-late (bī-ŏs'ĕ-lāt), *a.* [*bi-* + *ocellate*.] Having two ocelli.

bi'o-chem'is-try (bī'ŏ-kĕm'ĭs-trĭ), *n.* [*bio-* + *chemistry*.] The chemistry of living organisms; biological chemistry. — **bi'o-chem'ic** (kĕm'ĭk), **bi'o-chem'i-cal** (-ĭ-kăl), *a.* — **bi'o-chem'ist**, *n.*

bi'o-dy-nam'ics (bī'ŏ-dī-năm'ĭks; -dĭ-), *n.* [*bio-* + *dynamics*.] The branch of physiology which treats of the active vital phenomena of organisms; — opposed to *biostatics*. — **bi'o-dy-nam'ic** (-ĭk), **bi'o-dy-nam'i-cal** (-ĭ-kăl), *a.*

bi'o-gen (bī'ŏ-jĕn), *n.* [*bio-* + *-gen*.] *Biol.* **a** The supposed ultimate protoplasmic unit of which cells are built up. See BIOPHORE. **b** The substance of the supposed spiritual body.

bi'o-gen'e-sis (-jĕn'ĕ-sĭs) } *n.* [*bio-* + *genesis*.] *Biol.*
bi-og'e-ny (bī-ŏj'ĕ-nĭ) } **a** The doctrine that the genesis or production of living organisms can take place only through the agency of living germs or parents, — opposed to *abiogenesis*. **b** The history of the evolution of organisms. See ONTOGENY, PHYLOGENY. — **bi'o-ge-net'ic** (-jĕ-nĕt'ĭk), **bi'o-ge-net'i-cal** (-ĭ-kăl), *a.* — **bi'o-ge-net'i-cal-ly**, *adv.*

bi'o-ge-og'ra-phy (-jĕ-ŏg'ră-fĭ), *n.* [*bio-* + *geography*.] The branch of biology which deals with the geographical distribution of animals and plants. It includes both zoögeography and phytogeography. — **bi'o-ge'o-graph'ic** (-jē'ŏ-grăf'ĭk), *a.* — **bi'o-ge'o-graph'i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

bi'o-graph (bī'ŏ-grăf), *n.* [*bio-* + *-graph*.] **1.** An animated picture machine for screen projection; a cinematograph.
2. [Cf. BIOGRAPHY.] A biographical sketch. *Rare.*

bi-og'ra-pher (bī-ŏg'ră-fẽr), *n.* One who writes biography.

bi'o-graph'ic (bī'ŏ-grăf'ĭk) } *a.* Of or pertaining to biography; containing biography. — **bi'o-graph'i-cal-ly**, *adv.*
bi'o-graph'i-cal (-ĭ-kăl) }

bi-og'ra-phy (bī-ŏg'ră-fĭ), *n.*; *pl.* -PHIES (-fĭz). [Gr. βιο-γράφος, tone.] Consisting of two notes; as, a *binotonous* cry.

bi'nous (bī'nŭs), *a.* = BINATE.

bin-ox'ide (bĭn-ŏk'sĭd; bī-nŏk'-; -sĭd; 184), *n.* [*bin-* + *oxide*.] *Chem.* A dioxide.

In its broadest sense it includes zoology, botany, physiology, anatomy, cytology, embryology (see these terms), and allied sciences, but in common usage it implies the study of the principles of widest application to the origin, development, structure, functions, and distribution of plants and animals, and the more generally occurring phenomena accompanying their life, growth, and reproduction. (Cf. SCIENCE.) Among the important and now accepted principles of biology are the cell theory, the doctrine of evolution, belief in the accompaniment of all vital processes by chemical change or metabolism, — the old theories of spontaneous generation, and of the separate creation of species, having been abandoned. See CELL, EVOLUTION, ABIOGENESIS, METABOLISM.

bi'o-mag'net-ism (bī'ō-măg'nĕt-ĭz'm), *n.* [*bio-* + *magnetism.*] Animal magnetism. — **-mag-net'ic** (-măg-nĕt'ĭk), *a.*

bi-om'e-try (bī-ŏm'ē-trĭ), *n.* [*bio-* + *-metry.*] **1.** Calculation of the probable duration of human life.
2. *Biol.* The statistical study of variation
— **bi'o-met'ric** (bī'ō-mĕt'rĭk), **-ri-cal** (-rĭ-kăl), *a.* — **-met'ri-cal-ly,** *adv.* — **bi-om'e-tri'cian** (bī-ŏm'ē-trĭsh'ăn), *n.*

bi'on (bī'ŏn), *n.* [Gr. βιών living, p. pr. of βιοῦν to live] *Biol.* The physiological individual, characterized by definiteness and independence of function, in distinction from the morphological individual, or *morphon.*

bi'o-nom'ic (bī'ō-nŏm'ĭk) } *a.* Of or pert. to bionomics or
bi'o-nom'i-cal (-ĭ-kăl) } bionomy. — **-nom'i-cal-ly,** *adv.*
bionomic forces, external forces (that is, other than vital forces) which influence the development of life.

bi'o-nom'ics (-nŏm'ĭks), *n.* [*bio-* + *-nomics* as in *economics.*] The branch of biology which deals with the relations of organisms to their environment; ecology.

bi-on'o-mist (bī-ŏn'ō-mĭst), *n.* A student of bionomics.

bi-oph'a-gous (bī-ŏf'ā-gŭs), *a.* [*bio-* + *-phagous.*] *Biol.* **a** Deriving sustenance from living organisms; as, a *biophagous* plant. **b** Parasitic. *Rare.*—**bi-oph'a-gism** (-jĭz'm), *n.*

bi'o-phore, bi'o-phor (bī'ō-fōr), *n.* [*bio-* + *-phore.*] *Biol.* The smallest body of matter capable of life; the hypothetical ultimate supramolecular vital unit. *Weismann.* The *biophore* is more or less nearly equivalent to *bioblast* (Altmann), *pangen* (De Vries), *plasome* (Wiesner), and *biogen* (Verworn). Biophores are conceived of by Weismann to be successively aggregated into larger groups called: **a** *Determinants,* still beyond the limits of microscopical vision; **b** *Ids,* identified with the visible granules of chromatin; and **c** *Idants,* or chromosomes.

bi'o-pho'to-phone (-phō'tō-fōn), *n.* [*bio-* + *photo-* + *-phone.*] An instrument combining a cinematograph and a phonograph so that the moving figures on the screen are accompanied by the appropriate sounds.

bi'o-plasm (bī'ō-plăz'm), *n.* [*bio-* + *plasm.*] *Biol.* Protoplasm in a living, forming, or germinal state. *Beale.* — **bi'o-plas'mic** (-plăz'mĭk), *a.*

bi'o-plast (-plăst), *n.* [*bio-* + *-plast.*] *Biol.* A tiny mass of bioplasm, in itself a living unit and having formative power. Nearly or exactly equivalent to CELL, 3. *Obs.*

bi'o-plas'tic (-plăs'tĭk), *a.* *Biol.* Bioplasmic.

bi'o-psy'chic (bī'ō-sī'kĭk) } *a.* [*bio-* + *psychic, -cal*] Per-
bi'o-psy'chi-cal (-kĭ-kăl) } taining to psychical phenomena in their relation to the living organism or to the general phenomena of life.

bi'or'gan (bī'ôr'găn), *n.* [*bio-* + *organ.*] *Biol.* A physiological organ as distinguished from a morphological organ or *idorgan.*

bi'o-scope (bī'ō-skōp), *n.* [*bio-* + *-scope.*] **1.** A view of life; that which gives such a view. *Oxf. E. D.*
Bagnall's *Bioscope:* Various Views of Men and Manners. [*Book Title.*] *W. Bayley* (1824).
2. An animated picture machine for screen projection; a cinematograph (which see).

bi'o-stat'ics (-stăt'ĭks), *n.* [*bio-* + *statics.*] *Biol.* The study of the structure of organisms in relation to their functions; — opposed to *biodynamics.* — **bi'o-stat'ic, bi'o-stat'i-cal** (-ĭ-kăl), *a.*

bi-o'ta (bī-ō'tă), *n.* [NL. See BIOTIC.] *Biol.* The animal and plant life of a region.

bi-ot'ic (bī-ŏt'ĭk), *a.* [Gr. βιωτικός pert. to life.] *Biol.* Relating to life; as, the *biotic* principle.

bi'o-tite (bī'ō-tīt), *n.* [After J. B. *Biot,* French naturalist.] *Min.* A species of mica, generally black or dark green, forming a common constituent of crystalline rocks. It is a silicate of iron, magnesium, potassium, and aluminium. H., 2.5-3. Sp. gr., 2.7-3.1. See MICA. — **bi'o-tit'ic** (-tĭt'ĭk), *a.*

bi-pal'mate (bī-păl'māt), *a.* [*bi-* + *palmate.*] *Bot.* Palmate with the segments again palmate.

bip'a-rous (bĭp'ā-rŭs), *a* [*bi-* + *-parous.*] **1.** *Zoöl.* Bringing forth two young at a birth.
2. *Bot.* Having two branches or axes; — said of a cyme.

bi-par'ti-ble (bī-pär'tĭ-b'l), *a.* [See BIPARTITE.] Capable of being divided into two parts.

bi-par'ti-ent (-tĭ-ĕnt), *a.* [L. *bipartiens,* p. pr. of *bipartire.*] Dividing into two parts. — *n.* A number that divides another into two equal parts without a remainder.

bi-par'tile (bī-pär'tĭl; -tīl; 182), *a.* Divisible into two parts.

bi-par'tite (-tīt; 277), *a.* [L. *bipartitus,* p. p. of *bipartire; bi-* + *partire.* See PARTITE.] **1** Being in two parts; having two correspondent parts, as a legal contract or writing, one for each party; shared by two; as, a *bipartile* treaty.
2. Divided into two parts almost to the base, as a leaf; consisting of two parts or subdivisions.
3. *Math.* Having all its real points comprised in two distinct continuous series of points.
bipartite curve, *Math.,* a curve of two parts not continuous with each other. — **b. number.** See PARTITION OF NUMBERS.

bi'par-ti'tion (bī'pär-tĭsh'ŭn), *n.* Act of dividing, or state of being divided, into two parts, or two correspondent parts.

bi'ped (bī'pĕd), *n.* [L. *bipes; bi-* + *pes, pedis,* foot.]
1. A two-footed animal, as man.
2. *Vet.* Any two of the legs of a horse or other quadruped. The two fore legs constitute the anterior biped; the two legs of one side a lateral biped; a fore leg and the opposite hind leg a diagonal biped.

bi'ped, *a.* Two-footed.

> By which the man, when heavenly life was ceased,
> Became a helpless, naked, *biped* beast. *Byrom.*

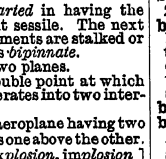
bi'pe-dal (bī'pĕ-dăl; bĭ'p'ĕ-, 277), *a.* [L. *bipedalis.* See BIPED, *n.*] **1.** Having two feet; biped.
2. Of or pertaining to a biped.

bi-pet'al-ous (bī-pĕt'ăl-ŭs), *a.* [*bi-* + *petalous.*] *Bot.* Having two petals.

bi'pin-na'ri-a (bī'pĭ-nā'rĭ-ȧ), *n.* [NL.; *bi-* + L. *pinna* feather.] *Zoöl.* A bilaterally symmetrical, free-swimming larval stage of certain starfishes. It swims by the motion of cilia borne on cells arranged in rings or bands.

bi-pin'nate (bī-pĭn'āt) } *a.* [*bi-* + *pinnate.*] Doubly pin-
bi-pin'nat-ed (-nāt-ĕd) } nate. Cf. BIPINNATISECT.

bi'pin-nat'i-fid (bī'pĭ-năt'ĭ-fĭd), *a.* [*bi-* + *pinnatifid.*] *Bot.* Pinnatifid with the segments or divisions also pinnatifid.



Bipinnate Leaf.

bi'pin-nat'i-part'ed (-pär'tĕd) } *a.* [*bi-*
bi'pin-nat'i-par'tite (-pär'tīt) } + *pinnatiparted, -partite.*] *Bot.* Twice pinnately parted; — differing from *bipinnatifid* in having the divisions extending nearly to the midrib.

bi'pin-nat'i-sect (-năt'ĭ-sĕkt) } *a.* [*bi-*
bi'pin-nat'i-sect'ed (-sĕk'tĕd) } + *pinnatisect.*] *Bot.* Twice pinnately cut or divided; — differing from *bipinnatiparted* in having the divisions extending to the midrib, but sessile. The next degree of differentiation, when the segments are stalked or otherwise wholly distinct, is known as *bipinnate.*

bi-pla'nar (bī-plā'năr), *a.* Lying in two planes.
biplanar point of a surface, *Math.,* a double point at which the proper cone of tangent lines degenerates into two intersecting planes. See CONICAL POINT.

bi'plane (bī'plān), *n.* [*bi-* + *plane.*] An aeroplane having two main supporting planes, in typical forms one above the other.

bi-plo'sion (bī-plō'zhŭn), *n.* [*bi-* + *explosion, implosion*] *Phon.* The combined effect produced by the implosion and subsequent explosive release of the breath in the formation of a stop. See *Guide to Pron.,* § 56. *Lloyd.* — **bi-plo'sive** (-sĭv), *a.* & *n.*

bi-po'lar (bī-pō'lar), *a.* Having two poles; as, a *bipolar* dynamo; — in anatomy said esp. of cells running out into a process at each end. — **bi'po-lar'i-ty** (bī'pō-lăr'ĭ-tĭ), *n.*

Bi'pont (bī'pŏnt), **Bi-pon'tine** (bī-pŏn'tĭn), *a.* *Bibliog.* Relating to Zweibrücken, or Deuxponts (Lat. *Bipontium*), in Bavaria; — said of certain editions of the classics, the first of which were printed at Zweibrücken, and the last at Strassburg, in the latter part of the 18th century.

bi'prism (bī'prĭz'm), *n.* [*bi-* + *prism.*] **a** A prism whose refracting angle is very nearly 180 degrees. **b** A combination of two short rectangular glass prisms cemented together at their diagonal faces so as to form a cube; — called also *optical cube.* It is used in one form of photometer.

bi-punc'tal (bī-pŭŋk'tăl), *a.* Having, or pert. to, two points.
bipunctal coördinates. See COÖRDINATE, *n.*

bi-pyr'a-mid (-pĭr'ā-mĭd), *n.* A bipyramidal form or crystal.

bi'py-ram'i-dal (bī'pĭ-răm'ĭ-dăl), *a.* Consisting of two pyramids placed base to base; having a pyramid at each of the extremities of a prism, as in quartz crystals.

bi'quad-ran'tal (bī'kwŏd-răn'tăl), *a.* *Math.* Of or pertaining to two quadrants.
biquadrantal versor, a versor that turns all points in space about a given axis through two right angles.

bi-quad'rate (bī-kwŏd'rāt), *n.* [*bi-* + *quadrate.*] *Math.* The fourth power, or the square of the square. Thus $4 \times 4 = 16$, and $16 \times 16 = 256$, the *biquadrate* of 4.

bi'quad-rat'ic (bī'kwŏd-răt'ĭk), *a.* [*bi-* + *quadratic.*] *Math.* Of or pertaining to the biquadrate, or fourth power.
biquadratic equation, *Alg.,* an equation of the fourth degree, or an equation in which the highest power of the unknown quantity is the fourth. — **b. root,** the square root of the square root; fourth root; as, 3 is the *biquadrate* root of 81. — **b. transformation,** *Math.,* a transformation by aid of which the variables of one system are represented as biquadratic functions of the variables of a second system.

bi'quad-rat'ic, *n.* *Math.* **a** A biquadrate. **b** A biquadratic equation.

bi'quartz (bī'kwôrts), *n.* [*bi-* + *quartz.*] *Min.* A quartz plate of two sections which turn the plane of polarization in opposite directions. It is used with a polariscope.

bi'qua-ter'ni-on (bī'kwä-tûr'nĭ-ŭn), *n.* [*bi-* + *quaternion.*] *Math.* **a** A quantity of the form $p + q\sqrt{-1}$, in which p and q denote quaternions. **b** A quaternion, $w + xi + yj + zk$, in which w, x, y, and z are complex numbers.

bi-quin'tile (bī-kwĭn'tĭl; -tīl; 182), *n.* [*bi-* + *quintile.*] *Astrol.* An aspect of the planets when their positions are twice the fifth part of a great circle apart, that is, at an angle of 144 degrees.

bi-ra'di-ate (bī-rā'dĭ-āt) } *a.* [*bi-* + *radiate.*] Having two
bi-ra'di-at'ed (-āt'ĕd) } rays.

bi-ra'mous (bī-rā'mŭs), *a.* [*bi-* + *ramous.*] Having, or consisting of, two branches.

bi-ra'tion-al (bī-răsh'ŭn-ăl), *a.* *Math.* Pertaining to or designating a transformation in which each set of variables is expressed rationally through the other set.

birch (bûrch), *n.*; *pl.* BIRCHES (bûr'chĕz; -chĭz). [ME. *birche, birk,* AS. *birce, bierce, beorc;* akin to Icel. *björk,* Sw. *björk,* Dan. *birk,* D. *berk,* OHG. *piricha,* MHG. *birche, birke,* G. *birke,* Russ *bereza,* Pol. *brzoza,* Serv. *breza,* Skr. *bhūrja.*] **1.** **a** Any tree of the genus *Betula,* the species often being indicated by an adjective, as *white birch, river birch,* etc. Birches are valuable timber trees, most of them having a hard close-grained wood which takes a fine polish. The smooth outer bark of the sweet or cherry birch is spicy and aromatic. That of the white birch of Europe is used for tanning; that of the paper birch splits into thin plates having a good writing or drawing surface. Several varieties of the native species are cultivated for ornament. See BETULA; also PAPER BIRCH, WHITE BIRCH, RIVER BIRCH, YELLOW BIRCH, SWEET BIRCH. **b** In Australia, the piripiri. **c** In New Zealand, any of various trees considered to resemble true birches. The name *birch* (qualified by various adjectives, — *white, black, red, silver,* etc.) is given to the native beeches (*Fagus*) and to many small-leaved forest trees.
2. The wood or timber of the birch.
3. A birch twig or birch twigs, used for flogging. The tough twigs of the common European birch (*B alba*) were formerly much used for rods in schools. They were also made into brooms.

> The threatening twigs of *birch.* *Shak.*

4. A birch-bark canoe.
birch of Jamaica. See JAMAICA BIRCH.

birch, *a.* Of or pertaining to the birch; birchen.

birch, *v. t.;* BIRCHED (bûrcht); BIRCH'ING. To whip with a birch rod or twig; to flog.

birch'en (bûr'ch'n), *a.* Of or relating to birch. *Scott.*

birch'ing, *vb. n.* **1.** A whipping with a birch; a flogging.
2. The cutting and hauling of birch timber. *U. S.*

birch oil. **a** An oil obtained by dry distillation of the bark of the European white birch, used in the manufacture of Russia leather (to which it gives the characteristic odor), and sometimes in medicine. **b** An essential oil from the cherry birch. It consists almost entirely of methyl salicylate, and is used as a substitute for oil of wintergreen.

birch wine. Wine made of the spring sap of the birch.

bird (bûrd), *n.* [ME. *bird, bred, bird,* young bird, bird, AS. *bridd* young bird.] **1.** The young of any animal; as: **a** The young of a feathered vertebrate (a bird in sense 2), as a chick, eaglet, duckling; a nestling. *Obs. or Dial.* [In the oldest preserved instances of its use *bird* has this sense.]

> As that ungentle gull, the cuckoo's *bird,*
> Useth the sparrow. *Shak.*

b The young of mammals, reptiles, fishes, insects. "A serpent . . . brought forth his *birds* there." *Gesta Romanorum. Obs.* **c** The human young; a youngster. *Obs.,* except in the specific sense of girl or maiden (early confused with BURD, and perhaps with BRIDE), which has come to be understood as fig. or as a term of endearment.

> His bastard *birds* bear some witness. *John Knox.*

2. Any member of a class of warm-blooded vertebrates, distinguished from all other animals by the body being more or less completely covered with feathers. Birds are the most highly developed animals excepting the Mammalia. They are descended from the reptiles, which they resemble anatomically, and with which they form the group Sauropsida (see SAUROPSIDA). They have a four-chambered heart and fully separated pulmonary and systemic blood circulations, and one aortic arch (the right). They are oviparous, laying very large eggs with a hard chalky shell. The fore limbs are modified into wings (sometimes rudimentary), fitted for

Bird (Waxwing). 1 Forehead; 2 Crown; 3 Occipital Region; 4 Lore; 5 Auricular Region; 6 Breast; 7–8 Abdomen; 9 Crissum (Under Tail Coverts); 10 Tail (Rectrices); 11 Primaries; 12 Secondaries; 13 Upper Wing Coverts; 14 Alula or Bastard Wing; 15 Scapulars

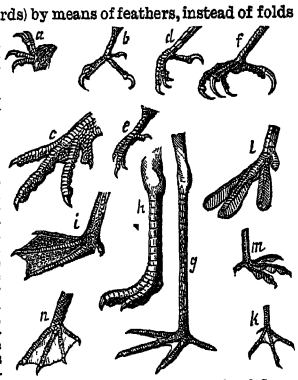
flight (in flying birds) by means of feathers, instead of folds of skin or membranes, as in all other flying animals. Existing birds have the jaws or bill covered with a horny or leathery sheath, but no teeth; and in most cases the breast bone has a deep ridge or keel for the attachment of the pectoral muscles which move the wings. There are often extensive air cavities under the skin and in certain bones, which communicate with the lungs. The class Aves, which includes all birds, is divided into the following primary subdivisions:



Feet of Birds *a* Adhamant (Swift); *b* Scansorial or Zygodactyl (Cuckoo); *c* Rascorial (Fowl); *d* Insessorial (Finch); *e* Syndactyl (Kingfisher); *f* Raptorial (Hawk); *g* Grallatorial (Stork); *h* Cursorial (Ostrich); *i* Palmate (Duck); *k* Semipalmate (Sandpiper); *l*, *m* Lobate (Grebe and Coot), *n* Totipalmate (Pelican).

Subclass I. Archæornithes. Includes only the extinct *Archæopteryx*

Subclass II. Neornithes.

Division A. Ratitæ. Birds with a keelless sternum, incapable of flight. Includes the ostriches, rheas, emu, cassowaries, the genus *Apteryx* and related extinct forms.

Division B. Odontolcæ. Extinct, toothed swimming birds, *Hesperornis* and related forms. Sternum keelless.

Division C. Carinatæ. Birds with a keeled sternum. Includes all living birds except the above-mentioned Ratitæ.

3. Specif., among sportsmen, a game bird.

4. A saucer of pottery or other material made to be thrown from a spring trap, and used as a substitute for a live bird in trap shooting; a clay pigeon.

5. A person or thing of peculiar character, whether in respect to excellence, oddity, incapacity, offensiveness, etc. (Cf. RARA AVIS.) *Collog. or Slang.*

There we fell in with a *bird* in mahogany tops, and, as usual, Drysdale began chumming with him. He knew all about the fishing of the next three counties. I daresay he did. *T. Hughes.*

☞ *Bird* is used in many combinations, phrases, proverbs, and figurative senses, based originally upon real or supposed habits or characteristics of birds, as: in sense 5 above, in *jail bird;* in **bird-witted**, flighty, lacking the faculty of attention; **the bird in one's bosom**, one's secret or secret thought, one's conscience; **a bird of one's own brain**, one's own idea; "**a little bird tells me**," etc.

a bird in the hand, a present or possessed advantage or good. — **b. of freedom**, the bald eagle, which is represented on the coat of arms and coins of the United States. — **b. of Jove**, the eagle. — **b of Juno**, the peacock. — **b. of Minerva**, the owl. — **b. of night**, the owl. *Shak.* — **b. of paradise. a** (1) Any of a number of very beautiful oscine birds of the family Paradiseidæ and subfamily Paradiseinæ, inhabiting New Guinea and the adjacent islands, notable for the brilliant colors, elegant plumes, and often remarkably developed tail feathers of the adult males. The females and young are without plumes and are plainly colored. Among the best-known and most beautiful species are: the **great emerald** (*Paradisea apoda*) and the **lesser emerald** (*P. minor*), which are killed in large numbers for their plumes for millinery purposes; the **red** (*P. sanguinea*); the **king** (*Cincinnurus regius*); the **superb** (*Lophorhina superba*); the **magnificent** (*Diphyllodes magnificus*); and the **six-shafted** (*Parotia sexpennis*). The subfamily Epimachinæ of the same family (Paradiseidæ) also includes beautiful species, as the **twelve-wired** (*Seleucides ignotus*), with six long recurved feathers on each side ending in slender filaments. (2) In New South Wales, the lyre bird; — so called by the early settlers. See LYRE BIRD. **b** [*cap.*] *Astron.* = APUS, 2. — **b.-of-paradise flower**, an ornamental musaceous plant (*Strelitzia reginæ*), often cultivated for its scapes of peculiarly shaped orange and purple flowers. According to the episcopalian theory, the office of bishop is held in direct succession from the apostles; according to the presbyterian theory, the bishop has become superior to the presbyter merely as an administrative officer. In the Eastern Church the bishop claims succession from the apostles, has jurisdiction over a specified diocese, and is usually chosen from a monastic order. In the Roman Catholic and Anglican churches the apostolic succession is recognized, and jurisdiction is specified by see, or diocese, but in the one case appointment is by the Pope, while in the other the bishop is elected by virtue of a license from the English crown. In the Protestant Episcopal Church of the United States the bishop lacks political recognition and is chosen by a convention of delegates. In the Reformed Episcopal Church, as in the Presbyterian Church, the view is that the bishop is a presbyter presiding over a presbytery and not a member of a different order of clergy, but the doctrine of apostolic succession is maintained. In the Methodist Episcopal and some other churches bishops are merely administrative superiors, or superintendents, and are elected by the General Conference. Lutheran bishops are overseers or superintendents of churches; in Scandinavian countries they have, like some of the Anglican bishops, seats in their national parliaments. Moravian bishops claim succession from the apostles, but exercise joint, not diocesan, jurisdiction. In the Mormon Church the bishop is an administrative and judicial officer belonging to the lesser order of priesthood.

Symbol, *Bi;* atomic weight, 208.0. Bismuth occurs native in veins, usually in arborescent, foliated, or granular forms, and also in combination in bismuthinite, aikinite, tetradymite, bismite, bismutite, etc., from which it is obtained by roasting and smelting. The metal melts at 269° C. (516° F.) and has the sp. gr. 9.8. Weight per cu. ft., about 612 lbs. It is used chiefly in the formation of alloys, which are characterized by low fusibility and by expanding on solidification. Salts of bismuth are used in medicine, in calico printing, and in the manufacture of cosmetics, glass, porcelain, etc. Chemically, bismuth is trivalent and pentavalent and resembles arsenic and antimony; its trioxide, however, is not acidic. It is the poorest conductor of heat among the metals.

bis'muth-al (-mŭth-ăl), *a.* Of or pertaining to bismuth.

bis'muth-ate (-āt), *n.* A salt of bismuthic acid.

bismuth glance. Bismuth sulphide; bismuthinite.

blas'phe-mous (blăs'fē-mŭs; *formerly also accented* blasphe'mous, *after the Latin, as in Milton*), *a.* [L. *blasphemus*, Gr. βλάσφημος.] Speaking or writing blasphemy; uttering or exhibiting anything impiously irreverent; profane; as, a *blasphemous* person, a *blasphemous* book.

Nor from the Holy One of Heaven
Refrained his tongue *blasphemous* *Milton*

— **blas'phe-mous-ly,** *adv.* — **blas'phe-mous-ness,** *n.*

blas'phe-my (blăs'fē-mĭ), *n.*; *pl.* -MIES (-mĭz). [L. *blasphemia*, Gr. βλασφημία: cf. OF. *blasphemie*.] **1.** In Jewish law, cursing or reviling God or the king, who was God's representative; in later usage, pronouncing the forbidden name of God (see TETRAGRAMMATON). In Biblical times the penalty for blasphemy was death by stoning.

2. Indignity offered to God in words, writing, or signs, as speaking evil of God; also, act of claiming the attributes or prerogatives of deity. Besides being an ecclesiastical offense, blasphemy is a crime at the common law, as well as generally by statute, as tending to a breach of the peace and being a public nuisance or destructive of the foundations of civil society; when written or printed it is a libel.

3. Abusive expression or action; calumny, vilification.

Punished for his *blasphemy* against learning. *Bacon.*
Error may be dull if it chooses; but there is no artistic *blasphemy* equal to so placing the harp of truth as to make it sound harsh and wooden when you strike it fairly. *Josiah Royce.*

Syn. — Sacrilege, impiety, irreverence; imprecation, execration, malediction, anathema. — BLASPHEMY, PROFANITY, CURSING, SWEARING agree in the idea of impious or irreverent speech. BLASPHEMY, the strongest term, is intentional indignity or defiance offered to God or sacred things; PROFANITY has wider range, and includes all irreverent reference to holy things, esp. the light or impious mention of the names, titles, attributes, or acts of God. SWEARING is properly a broader term than CURSING, which properly implies imprecation. *To swear at*, however, is the same as *to curse*, and the two words are in general somewhat freely interchanged. See CURSE, PROFANATION, IRRELIGIOUS.

block-ade' (blŏk-ād'), *n.* [Cf. It. *bloccata*. See BLOCK, *v. t.*] **1.** The shutting up of a place by troops or ships so as to prevent ingress or egress, or the reception of supplies, as by an investment with war vessels. According to the practice of England and the United States and generally of modern warfare: "Blockades in order to be binding must be effective, that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy." (*Declaration of Paris, rule* 4.) Under this a blockade need not actually prevent all access, but it must render attempts to violate the blockade so dangerous as to come reasonably near so doing. A blockade, also, is binding only when instituted as a war measure, and only against neutrals to whom the intention to blockade has been communicated.

2. The force maintaining a blockade.

3. An obstruction to passage.

Syn. — BLOCKADE, SIEGE. A *blockade* differs from a *siege* in that the latter technically implies an attack upon the place invested, which the former does not; also, from the fact that most *blockades* are necessarily made by sea, the terms *siege* and *blockade* are commonly (though not of necessity technically) distinguished as referring, the one to land operations, the other to those by water.

Blood consists of a fluid or *plasma*, in which colorless or colored cells called *corpuscles* are suspended. In invertebrates it is either colorless or variously colored, in *Amphioxus* it is colorless, but in the remaining vertebrates it is red, due to pigment (hæmoglobin) contained in the corpuscles. (See HÆMOGLOBIN.) In mammals these *colored* or *red corpuscles*, called also *blood disks*, are disk-shaped with thick edges, circular in outline (except in the camels and llamas, where they are slightly oval), and without a nucleus. Healthy human blood contains about 5,000,000 to the cubic millimeter, and they are from 0.007 to 0.008 millimeter in diameter. In the other classes of vertebrates the red corpuscles are more or less oval, and always have a nucleus. Even in mammals they are nucleated in the blood of the fetus. The red corpuscles carry the oxygen from the lungs to the various parts of the body. The blood of all vertebrates contains also a smaller number (in man about 10,000 to the cubic millimeter) of colorless, nucleated, amœbalike cells, called *white corpuscles* or *leucocytes* (see LEUCOCYTE). When removed from the body, the blood of man and many vertebrates rapidly solidifies or *clots*, due to the formation of threads of insoluble fibrin. See FIBRIN, BLOOD PLAQUES.

Syn. — Short, abrupt, unceremonious, uncivil, impolite, rude, surly. — BLUFF, BLUNT, BRUSQUE, CURT, CRUSTY agree in the idea of abruptness in speech or manner (see CONCISE). BLUFF, the only term of the group used in a good sense, connotes heartiness, good nature, unconventionality; as, a *bluff* countenance, *bluff* honesty, the *bluffness* of a soldier or sailor. BLUNT (see BLUNT) implies lack of consideration for others' feelings, and some disregard for the amenities of life, as, a *blunt* reply, *blunt* manners. *Bluntness* is often wrongly used as synonymous with *frankness* (see FRANK), as if one could not be frank without being discourteous. BRUSQUE suggests a certain (real or apparent) tartness of temper and ungraciousness of speech, as, a *brusque* refusal. CURT denotes excessive brevity or rude conciseness; as, a *curt* answer, nod. CRUSTY (see SULLEN) adds to *curt* the implication of greater crabbedness or harshness, sometimes, however, belying real kindness of heart; as, a *crusty* old bachelor.

The old gentleman was burly and *bluff*, very kind and generous, but passionate. *H. C. Robinson.*

I have authentic intelligence of his being a critical character in all its forms, acute, sour, and *blunt* *Cowper*

4. Barren or unfruitful, as soil. *Obs.*

5. Abrupt in address; wanting the forms of civility; rough in manners or speech; plain; unceremonious; bluff "Hiding his bitter jests in *blunt* behavior." "A plain, *blunt* man." *Shak.*

Syn. — BLUNT, DULL, OBTUSE, STUPID come into comparison primarily as associated with sensibility or perception. BLUNT so used (for its application to speech, see BLUFF) implies a certain (sometimes temporary) callousness or lack of nice perception; as, *blunt* sensibilities; "And Enid could not say one tender word, she felt so *blunt* and stupid at the heart" (*Tennyson*); "She [Emilia] . . . is *blunt* in perception and feeling, and quite destitute of imagination" (*A. C. Bradley*). DULL implies a heavy and sluggish habit of mind, or a lack of vividness and intensity; OBTUSE, lack of sensitiveness, and even a certain impenetrability to emotions or ideas; as, a *dull* pupil, a *dull* book, a *dull* color, a *dull* ache or pain; an *obtuse* audience, his understanding was *obtuse;* "*obtuseness* of moral sense" (*Lowell*); "the obstinate *obtuseness* of our country in regard to one . . . of the fine arts" (*De Quincey*). STUPID denotes excessive dullness, when the faculties are, as it were, benumbed; as, "*stupid* with age" (*Shak.*); *stupid* as an owl; a *stupid* blunder. *Blunt, dull,* and *obtuse* also come into comparison as applied to tools, instruments, etc. *Blunt* and *dull* (opposed to *sharp, keen,* with reference to either point or edge) are sometimes interchanged. In present usage, however, BLUNT appears to be more commonly used of instruments or tools so made that a cross section near the edge subtends a relatively large angle; DULL, of a tool or instrument whose edge or point has lost its keenness or sharpness by use; thus, an ax, even when sharp, is a *blunt* instrument as compared with a razor; a crowbar is *blunter* than a chisel, though neither may be *dull* (cf., to strike a blow with the *blunt* — not *dull* — side of an ax or sword, as opposed to its flat or edge); a *dull* pencil is made so by use, but one may purposely put a *blunt* (not a *dull*) point on a pencil in sharpening it; the *blunt* nose of the beaver. OBTUSE (opposed to *acute*) suggests esp. the angle of the edge or point; it applies more frequently to the parts of plants or (sometimes) animals than to instruments or tools; as, an *obtuse* leaf; cf. an *obtuse* weapon (but not, an *obtuse* ax, pencil, sword). See LIFELESS, INSIPID; cf. SHARP.

A man possessed of such warm imagination commands all nature, and arrogates possessions of which the owner has a *blunter* relish. *Goldsmith.*

Know, Eusden thirsts no more for sack or praise;
He sleeps among the *dull* of ancient days. *Pope.*

Syn. — BODILY, PHYSICAL, CORPOREAL, CORPORAL. BODILY has the sense of pertaining or belonging to the body; it is opposed to *mental*; as, *bodily* labor, *bodily* pain. PHYSICAL is often synonymous with *bodily*; as, *physical* discomfort, *physical* suffering. It also applies more broadly to that which the body has in common with all material objects, and is thus opposed to *psychical, spiritual, moral*; as, the *physical* universe, *physical* force, courage. CORPOREAL refers more specifically to substance or nature; it is opposed to *immaterial, spiritual*; as, the *corporeal* frame, "to exclude spiritual substance with *corporeal* bar" (*Milton*). CORPORAL, originally synonymous with *bodily* in all its senses (as "*corporal* soundness," *Shak.*; "*corporal* servitude," *Milton*), in present usage applies almost exclusively to bodily infliction of some sort; as, *corporal* (never *corporeal*) punishment; "He publicly professed his resolution of a violent and *corporal* revenge" (*Johnson*). See BODY.

2. A vessel in which anything is boiled, as kettles, saucepans, clothes boilers, evaporators, coppers, retorts, etc.

3. *Mech.* A strong metallic vessel in which steam is generated for driving engines. Early boilers were usually approximately spheroidal, were fired from underneath, and usually made of thick cast metal. Later types had side flues added, as in the wagon, or caravan, boiler, so called from its shape, which resembled that of a covered wagon. Most modern steam-engine boilers are made of thin wrought iron, mild steel, or copper plates, riveted together, and (when used for high-pressure steam) strengthened against explosion or collapse by internal stays and stay tubes. High efficiencies are obtained by increasing the heating surface, as by internal and corrugated flues, fire tubes, water tubes of various kinds, etc. Modern boilers can be broadly separated into three classes: (1) using internal flues but no fire or water tubes; (2) using fire tubes; (3) using water tubes. In the first two classes the fire and the combustion products are more or less surrounded by water space. In the third the flames more or less surround the water, which passes through the tubes.

Class (1) includes: **a** The Cornish boiler, which has one internal flue. **b** The Lancashire boiler, with two internal

boil'a-ry. Var. of BOILERY.

boild. Boiled. *Ref. Sp.*

Boilers included under class (2) are called **fire-tube, multitubular,** or **tubular boilers,** and occur in various typical forms, as: **a** The **locomotive boiler,** used principally on locomotives, which has a nearly rectangular fire box and a series of longitudinal fire tubes passing from the fire box through a

cylindrical barrel to the smoke box. **b** The **marine,** or **Scotch, boiler,** which is usually a short cylindrical boiler with one or more internal flues leading to a combustion chamber at the end and return fire tubes to the uptake in the front. This boiler is sometimes made *double-ended,* thus comprising two *single-ended* boilers back to back. **c** The **vertical boiler,** a cylindrical boiler set on end and often resembling the Scotch boiler in general design. The boilers in class (3) are called **water-tube,** or **tubulous, boilers,** and are broadly subdivided into **drowned-tube boilers,** in which the steam-generating tubes emerge below the water line in the steam drum, and **priming boilers,** in which the tubes discharge at or above the water line. In the prevailing designs there are one or more steam drums at the top connected by straight or curved water tubes with one or more water drums at the bottom, and the flames from the fire are constrained to pass around and among these nests or coils of tubes so as to insure a free and rapid circulation of their contents. There are many special varieties. Water-tube boilers designed to get up steam with very great rapidity are known as **express boilers,** and are largely used on torpedo boats and destroyers. A

particular variety of water-tube boiler used principally in steam automobiles is called the **flash boiler.** It consists of a nest of strong tubes with very little water space, kept nearly red hot so that the water as it trickles drop by drop into the tubes is immediately flashed into steam and superheated. The usual fittings for boilers include safety valves, pressure and water gauges, gauge cocks, fusible plugs, blow-out cocks, injectors or feed pumps, steam traps, etc. **4.** A tank or reservoir in which hot water is stored. **5.** A sunken reef; esp., a coral reef where the sea breaks. **6** An article of food, as a vegetable, suitable to be cooked by boiling. *Colloq.*

6. *Law.* A writing under seal by which a person binds himself to pay a certain sum on or before a future day appointed. This is a **single,** or **simple, bond.** Usually a condition is added, that if the obligor shall do (or abstain from doing) a certain act on or before a time specified the obligation shall be void, but otherwise shall remain in full force. The principal sum mentioned in the obligatory part of a conditional bond is a *penal sum*, which is forfeited if the condition is not performed; but courts of equity will often restrict the forfeiture to compensatory damages.

7. Specif.: *Finance.* Such an instrument made by a government or corporation as an evidence of debt, usually for the purpose of borrowing money; hence, loosely, any interest-bearing certificate issued by a government or corporation, esp. when a date is set for the payment of the principal. These evidences of debt when issued by governments are sometimes called *stock*, esp. in England. (Cf. COUPON.) The bonds issued by corporations, private or municipal, are usually secured by a lien or mortgage upon property; those by governments are not, as a citizen could not enforce his lien. There are many forms of bonds, many of which are sufficiently described by their names, as **coupon bonds, mortgage bonds, first-mortgage bonds, sinking-fund bonds,** etc. Various other species of bonds are defined in their alphabetical places, as *consolidated bonds, equipment bonds,* etc.

8. One who acts as bail or surety.

A connection or system of connections in which adjacent parts of structure are made to overlap and are so tied or bound together; also, a timber, brick, stone, or the like, used in bonding; specif.: **a** *Masonry* The union or tie of the several stones or bricks which together form a wall. The bricks may be arranged for this purpose in several different ways, as in **English bond,** where the courses consist alternately of *headers* (bricks with their ends toward the face of the wall) and *stretchers* (bricks with their lengths parallel to the face of the wall); **Flemish bond,** where each course consists of headers and stretchers alternately, so laid as always to break joints; **cross bond,** in which courses of Flemish bond alternate with courses of stretchers. **English cross bond,** called also **cross bond,** is a modification of English bond in which the stretcher courses break joints with each other. The term **block bond** has been applied to both Flemish and English bond. **American bond,** called also in the United States **common bond,** differs from English bond in that headers recur every fifth or sixth course, instead of every other course. The stretcher courses that come together are laid so as to break joints. **Raking bond** is characterized by diagonal headers. It may be either diagonal, in which these headers are all parallel, or **herring-bone,** forming, in the plan, a herringbone pattern. **Clip bond** is a bond formed by clipping off the inner corners

See COPYRIGHT. **c** A literary composition; esp., a systematic treatise of considerable length.

A good *book* is the precious life blood of a master spirit, embalmed and treasured up on purpose to a life beyond life. *Milton.*

By the term "*book*" in the copyright law [of the United States] is understood a literary composition. All copyright legislation is based on the provision of the Constitution (Art. I sec. 8) granting to Congress the power to legislate to protect the writings of authors. For this reason, the mere fact that an article is printed, such as a mere list of words, or a sheet of disjointed phrases or sentences, or a blank form or a blank book, does not enable it to obtain protection Nor does the fact that an article is made up to resemble a book in form justify its registration for copyright protection It must be a *book* in literary substance. *U. S. Information Circular on Copyrights*

d A part or subdivision of a treatise or literary work; as, the tenth *book* of "Paradise Lost." **e** A volume in which accounts are kept; a register of debits and credits, receipts and expenditures, etc.

She comes *booming* down before it. *Totten.*

3. To have a rapid growth in market value or in popular favor; to develop rapidly in resource and population, as a town or district.

☞ The first use of *boom* in this sense was probably in the St. Louis "Globe-Democrat," July 18, 1878: "The Grant movement is *booming*." J. B. McCullogh, the author of the phrase, in a letter to the editors of the Century Dictionary, says: "I cannot explain how I came to use it, except that, while on the gunboats on the Mississippi river during the war, I used to hear the pilots say of the river, when rising rapidly and overflowing its banks, that it (the river) was 'booming.' The idea I wished to convey was that the Grant movement was rising — swelling, etc. The word seemed to be a good one to the ear and I kept it up. It was generally adopted about a year afterward. I used it as a noun after a while, and spoke of 'the Grant boom.' It is doubtful whether *booming*, as used by the pilots, derives from the sound made by the river or from the sudden rise following the breaking up of a boom."

boom, *v. t.* **1.** To give forth with a resonant or booming sound; — usually with *out*.

2. To cause a rapid growth or increase of in favor, price, sales, commercial development, political influence, etc.; to work or contrive for such a growth or increase of; to push; as, to *boom* a stock; to *boom* a town, or a candidate.

And they came fluttering in. *Fletcher.*

Syn. — BOOTY, PLUNDER, LOOT, PILLAGE, SPOIL, PREY agree in denoting that which is seized by violence. BOOTY and PLUNDER are alike used of seizures in war ; the words also apply to that which is gotten by robbery or theft. *Booty* frequently suggests the richness, *plunder* the considerable amount or varied character, of the spoil. LOOT is strictly the booty from a sacked city ; it sometimes implies the illicit or dishonorable acquisition of such spoils. SPOIL (commonly *pl.*) and PILLAGE usually suggest the violence of the act of seizing. In recent usage *spoil* is frequently applied to the emoluments of office, regarded as the rightful booty of a victorious political party ; as, "To the victors belong the *spoils*." PREY, in modern usage, is confined, in its literal sense, to that which is seized by carnivorous birds or animals ; fig., it is applied to the victims of any overwhelming force or power ; as, "For who, to dumb forgetfulness a *prey*" (*Gray*). See RAVAGE.

2. Wine from the region about Bordeaux, France, esp. that from the department of Gironde; also, wine, of any locality, resembling Bordeaux in its properties. Bordeaux wines are in general dry (except sauterne), still, full, and of pleasant bouquet, and contain 8–11 per cent of alcohol by volume. They receive their names from the districts, towns, or estates (*châteaux*) where they are produced, from the name of the grape, as *Cabernet*, etc. Distinction is also made as to wines produced on light gravelly lands (*graves*), on the hills (*côtes*), and on alluvial soils (*palus*). Of the red wines, to which the name *claret* is usually applied, those of *Médoc* include the best. These are carefully classified. To the "first growths" belong four: **Château Lafite** (often spelt **Lafitte**), **Ch. Margaux**, **Ch. Latour**, **Ch. Haut-Brion**. To the second belong **Ch. Larose**, **Ch. Léoville**, and **Ch. Ducru**, from *St. Julien*; **Cos d'Estournel** and **Ch. Montrose**, from *St. Estèphe*, etc. *St. Emilion* also produces good red wine. The best white wines are those of the *Sauternes* district, south of Bordeaux. Of these **Château Yquem** (**Haut Sauterne**) takes first rank, while several others, as **Ch. La Tour-Blanche**, are very fine. *Barsac* produces sauternes of both qualities.

5. *pl.* Scenery in a theater forming side wings, etc.

Syn. — Bound, boundary, limit, confine, frontier. — BORDER, MARGIN, VERGE, EDGE, RIM, BRIM, BRINK agree in the idea of a bounding or dividing line or surface. A BORDER is that part of a surface which is just within its boundary line, it is sometimes the boundary line itself, as, the *border* of a rug, of a flower bed, the Scotch *border*, over the *border*. A MARGIN is a *border* of definite width, or distinguished in some way from the remaining surface; it also applies to the space immediately contiguous to a body of water; as, the *margin* of a page, the *margin* of a lake or river. VERGE (frequently fig) denotes an extreme or remote border; as, "to the furthest *verge* that ever was surveyed by English eye" (*Shak.*); on the *verge* of ruin. An EDGE is a sharply defined terminating line; as, the *edge* of a table, of a cliff, of a knife; the water's *edge*. RIM usually applies to the edge of something circular or curving: BRIM, to the upper rim of a hollow vessel, or to the line of junction between land and water; as, the *rim* of the moon, the *rim* of a kettle, of a wheel; the *brim* of a teacup, full to the *brim*, the river's *brim*. A *rim* is regarded as an inclosing boundary; a *brim* as a terminating limit. BRINK denotes the edge of something steep; as, the *brink* of a precipice, on the *brink* of the grave, the river's *brink* (which differs from the river's *brim* in stressing the abruptness of the bank or shore rather than the close approach of the water to the edge). See SHORE, BOUND.

bore (bōr), *v. t.*; BORED (bōrd); BOR'ING (bōr'ĭng). [ME. *borien*, AS. *borian*; akin to Icel. *bora*, Dan *bore*, D. *boren*, OHG. *porōn*, G. *bohren*, L. *jorare*, Gr. *φαράν* to plow.] **1.** To perforate or penetrate (a body), as by turning an auger, gimlet, drill, or other instrument against it; to pierce; as, to *bore* a plank. Technically, wood is said to be *bored* and metal *drilled* when a hole is made in it by a rotating tool. Metal is said to be *bored* when a hole is made in it by rotating it against a stationary tool, or when a hole previously made in it is enlarged and trued by revolving either the metal or the tool.

2. To form or make by penetrating with or as with an auger, as, to *bore* a hole; to *bore* a well or a tunnel; specif., *Metal Working*, to form (a hole) by rotating the work against a stationary tool; also, to enlarge and true up (a hole) by successive cuts.

3. To make (a passage) by laborious effort; to force a difficult passage through; as, to *bore* one's way through a crowd.

"What bustling crowds I *bored*." *Gay.*

4. To push or thrust aside; as, in racing one horse may *bore* another out of his course.

5. To befool; trick. *Obs.*

6. [Perh. a different word.] To weary by tedious iteration or by dullness, to afflict with ennui by forcing one's conversation or presence upon.

Used to come and *bore* me at rare intervals *Carlyle*

bore, *v. i.* **1.** To make a hole or perforation with or as with a boring instrument; to cut a circular hole by the rotary motion of a tool; as, to *bore* for water or oil (i. e., to sink a well); to *bore* into a tree (as insects).

2. To be pierced or penetrated by an instrument that cuts as it turns; as, this timber does not *bore* well.

3. To push forward with laborious effort.

They take their flight . . *boring* to the west. *Dryden*

4. *Man.* To shoot out the nose or toss it in the air.

bore, *n.* [Cf. BORE, *v.*, and Icel. *bora* hole made by boring.]

1. A hole made by boring; a perforation; also, a hole or opening bearing, or fancied to bear, some resemblance to one so made, as the tubular outlet of a geyser.

2. An internal cylindrical cavity, as of a pipe or tube.

The *bores* of wind instruments. *Bacon.*

Love's counselor should fill the *bores* of hearing *Shak.*

Specif., *Ordnance:* **a** In old muzzle-loading ordnance, the entire interior tube, including cylinder, chamber, if one, and the part connecting these. **b** In modern breech-loading ordnance, that portion of the interior tube in front of the breechblock, including powder chamber, shot chamber, slopes, and the rifled portion of the tube.

3. The size of a hole; the interior diameter of a tube or gun barrel, the caliber. The size of the bore of a firearm was early designated by the number of spherical bullets fitting it which it took to weigh a pound, the larger the bore the smaller being the number. Shotguns still preserve this peculiarity, although the size of the bore no longer bears any relation to the number of the shot actually used which it takes to weigh a pound. In all other modern firearms the bore is designated by the *caliber* (which see).

4. [AS. *bor.*] A tool for boring, as an auger.

5. Caliber; importance. *Obs.*

Yet are they much too light for the *bore* of the matter. *Shak.*

6. A crevice; chink; opening.

It was the first blue *bore* . . in our cloudy sky *Baillie*

7. A perforated piece of iron to receive the shanks of nails while the heads are being hammered to shape.

8 [Perh. a different word.] Ennui or dullness as a state or malady (orig. referred to as a French disposition); also, one who suffers from this affliction. *Obs.*

9. A person or thing that wearies by prolixity or dullness; a tiresome person or affair, one that causes ennui.

It is as great a *bore* as to hear a poet read his own verses *Hawthorne*

bore, *n.* [Icel. *bāra* wave.] *Phys. Geog.* **a** A tidal flood which regularly or occasionally rushes with a roaring noise into certain rivers of peculiar configuration or location, in one or more waves which present a very abrupt front of considerable height, dangerous to shipping, as at the mouth of the Amazon, in South America, the Hugli and Indus, in India, and the Tsientang, in China. **b** Less properly, a very high and rapid tidal flow, when not so abrupt, such as occurs at the Bay of Fundy and in the British Channel.

bo're-al (bō'rē-ăl), *a.* [L. *borealis*; cf. F. *boréal*. See BOREAS.] **1.** Of or pertaining to Boreas, hence, northern.

Bright over Europe bursts the *boreal* morn. *Thomson*

2. [*cap.*] *Biogeog.* Designating or pertaining to a terrestrial division consisting of the northern and mountainous parts of both the Old and the New World; — equivalent to the *Holarctic region* exclusive of the Transition, Sonoran, and corresponding areas. The term is used by American authors and applied by them chiefly to the Nearctic subregion. The *Boreal* region includes approximately all of North and Central America in which the mean temperature of the hottest season does not exceed 18° C (= 64.4° F.). Its subdivisions are the Arctic zone and the boreal zone, the latter including the area between the Arctic and Transition zones and having as subdivisions the Hudsonian and Canadian zones.

boreal signs, the signs of the zodiac from Aries to Libra, which lie wholly or in part north of the celestial equator.

Gr. *βοτανικός* botanic, fr *βοτάνη* herb, plant, fr. *βόσκειν* to feed, graze.] **1.** The science of plants; the branch of biology dealing with plant life. Botany, in its broadest sense, comprises many subordinate sciences, each with a distinctive terminology. The most important of these are: *cytology*, treating of the cell; *morphology*, of external form; *anatomy* or *histology*, of internal structure; *physiology*, of life processes; *paleobotany*, of fossil plants; *ecology*, of the mutual relationship between plants and their environment; *taxonomy* or *systematic botany*, of plant classification; *phytogeography*, of plant distribution; *pathology*, of plant diseases. (See these terms.) **Applied,** or **economic, botany** deals with the uses of plants to mankind, and includes many branches, such as agriculture, horticulture, forestry, pharmacognosy, etc. The scientific study of botany began probably with Aristotle (384–322 B. C.), who recognized three divisions, trees, shrubs, and herbs. (See PLANT.) The herbalists, as Fuchs (1501-66) and Brunfels (1500-34), revived the science, their works dealt chiefly with plants of real or reputed medicinal value. Tournefort (1656-1708) and Linnæus (1707-78) were the fathers of modern systematic botany. Since 1890 researches have added much to the knowledge of plant physiology, morphology, and cytology, which had been subordinated to taxonomic study.

bot'fly' (bŏt'flī'), *n.* [See BOTS.] *Zool.* Any of numerous dipterous insects of the family Œstridæ, whose larvæ are parasitic on mammals. A common species infesting the horse is *Gastrophilus equi*. Its eggs are usually laid on the fore legs or shoulders of the horse and, when mature, hatch if licked by the animal. The larvæ, called *bots*, are thus taken into the stomach and intestines, where they live until ready to change into pupas. The sheep botfly (*Œstrus ovis*) lays its eggs in the nostrils of sheep, and the larvæ develop in the frontal sinuses, sometimes causing the death of the sheep. In tropical America one species sometimes lives under the human skin, and another in the stomach. See WARBLE FLY.

both (bōth), *a.* or *pron.* [ME. *bothe*, *bothe*, fr. Icel. *báðir*; akin to Dan. *baade*, Sw. *båda*, OHG. *beidê*, *bêdê*, G. & D. *beide*, also AS. *begen*, *bā*, *bū*, Goth. *bai*, and Gr. *ἀμφω*, L. *ambo*, Lith. *abù*, OSlav. *oba*, Skr. *ubha*. The last part of the word is due to the definite article added to the old form seen in AS. *bā*, Goth. *bai*. See THE.] The one and the other; the two, without exception of either. **1.** It is used substantively: **a** As a simple pronoun. In early use the possessive, *both's*, occurs.

He will bear *both*, because he is prepared for *both*. *Bolingbroke.*

b With *of* followed by the objective: (1) Regularly before pronouns; as, *both of* us, them, whom, etc. "She alone is heir to *both of* us." *Shak.* (2) Colloquially, before nouns (as, "*both of* the brothers"), where *both* without *of* (as, "*both* the brothers") is to be preferred. **c** In apposition with nouns or pronouns. When the verb *be* or other auxiliary is used, *both* follows it.

This said, they *both* betook them several ways. *Milton.*

Thy weal and woe are *both* of them extremes. *Shak.*

2. It is used adjectively: **a** Generally with nouns; as, *both* horses ran away. It now precedes any other attributive word, as a demonstrative or possessive, but formerly sometimes followed it; as, *both* these armies; *both* his eyes. "The *both* horns." *Chapman.* **b** With pronouns, now usually following; as, I changed them *both*. But in Middle English *both* might precede, and *both which* still regularly occurs. The pleonastic *both two*, *both twain*, and even *all both* were formerly used. **c** Formerly, with a pl. possessive and a noun, and sometimes inflected, as *bother*, *botheres*; as, "It was *both* our misfortune" (that is, the misfortune of both of us). The noun was later often made pl. "Were you *both* our mothers" (that is, the mother of both of us). *Shak.*

both, *conj. & adv.* [i. e., both (things). See BOTH, *a.*] **1.** As well; not only; equally. *Both* precedes the first of two coördinate words or phrases and is followed by *and* before the other, *both . . . and . . . .* It is also sometimes followed by more than two coordinate words connected by *and* expressed or understood. In this construction *both* is now not preceded by a possessive or adjective.

To judge *both* quick *and* dead. *Milton.*

A masterpiece *both* for argument *and* style. *Goldsmith.*

To whom *both* heven *and* erthe *and* see is sene. *Chaucer.*

And mete the *bounds* of hate and love. *Tennyson.*

3. Borderland; also, the tract within bounds; domain.

Syn. — Limit, term, termination, barrier, bourne, verge; border, march, precinct. — BOUND, BOUNDARY, CONFINE, FRONTIER agree in denoting that which limits or confines. BOUND applies to the limit itself, and is often used of that to which no concrete or definite term can be set; as, "I overleaped the *bounds* of modesty and use" (*Gibbon*); "He pass'd the flaming *bounds* of place and time" (*Gray*); his ambition knew no *bounds*, to break *bounds.* A BOUNDARY marks or indicates a *bound*; it usually implies for the object bounded a definite extent; as, the St. Lawrence forms part of the southern *boundary* of Canada; his knowledge has certain sharply defined *boundaries* (cf. realms beyond the *bounds* of knowledge); "a map of the *boundaries* which propriety sets to fancy" (*Cowper*). But *bound* and *boundary* are sometimes interchanged. CONFINE (chiefly *pl.*) often denotes a common *boundary*, or the borderland (lit. or fig.) between two countries or regions; as, the eastern *confines* of Russia; "The *confines* met of empyrean Heaven and of this world" (*Milton*). FRONTIER denotes that part of one country which fronts another, or (esp. in U. S.) the border of the settled and cultivated part of a country; it often connotes remoteness, difficulty, or danger; as, a *frontier* garrison, *frontier* life. See BORDER.

bound (bound), *v. t.*; BOUND'ED; BOUND'ING. **1.** To set limits to; to establish the bounds of; to confine. *Obs.*

He shall *bound* his reign with earth's wide bounds. *Milton.*

2. To limit; to terminate; to fix the furthest point of extension of; to lie along, or form, a boundary of; to inclose; circumscribe; restram; confine.

bound'a-ry (boun'da-rĭ), *n.*; *pl.* -RIES (-rĭz). [From BOUND a limit; cf. LL. *bonnarium* piece of land with fixed limits] **1.** That which indicates or fixes a limit or extent, or marks a bound, as of a territory, a bounding or separating line. In a deed of land where the boundary is stated in general words to be *along, on*, or *by*, a bank, ditch, highway, road, street, stream, pond, harbor, seashore, or other object of some width, the grantee is generally prima facie presumed to grant all his interest to the center of the object so named, or to the low-water mark, as the case may be, unless by some specific limitation the object is excluded. Cf FILUM AQUÆ, RIPARIAN RIGHTS, SEASHORE, etc.

Sensation and reflection are the *boundaries* of our thoughts *Locke.*

2. *Cricket.* **a** An arbitrary limiting line to a cricket field. A ball hit to the boundary counts a definite number of runs. **b** A hit to the boundary.

In the Rig-Veda *brahmā* (neuter, accented on the first syllable) signifies power, especially of prayer or devotion; later, it denotes the supreme soul or essence of the universe, immaterial, uncreated, illimitable, eternal. *Brahma* (or *Brahm* as it is also written) is the designation of God in the teachings of the Brahmo Samaj, and is conceived as comprising the trinity, Brahmā, Vishnu, and Siva. *Brahmā* (masculine, accented on the ultima) is the personification of the supreme *Brahm,* and is conceived as the creator of the world, which endures for 2,160,000,000 years and then is destroyed, only to be recreated by him after a like duration. Each period of this sort constitutes a day and night of Brahma, and after a hundred years of such days he himself, together with the whole universe, is resolved back to primordial elements. Cf. YUGA. *Brahmā* is represented as red with four heads. Originally he had five, but one was destroyed by Siva. His consort is Sarasvati, the goddess of eloquence.

Fig 1. Upper surface, showing Right and Left Cerebral Hemispheres *A E,* separated by the Longitudinal Fissure *aa; b* Fissure of Rolando; *c c c* Convolutions, or Gyri, separated by Sulci

Fig 2. Right half, shown by vertical section through the Longitudinal Fissure; *AA* Cerebrum. *BB* Cerebellum; *aa* Corpus Callosum; *b* Pineal Gland; *c c c* Convolutions; *d* Third Ventricle; *e* Pituitary Body; *f* Olfactory Lobe; *g* Optic Nerve; *i* Pons Varolii; *k* Medulla Oblongata, which connects the brain with the spinal cord

The brain consists of *gray matter* made up largely of nerve cells, and *white matter* made up chiefly of nerve fibers arising from the nerve cells of the brain, or reaching it from other parts of the body (see NERVE). In man the largest of the parts of the brain is the *cerebrum,* consisting principally of two *hemispheres,* separated by a longitudinal fissure and having an external layer or *cortex* of gray matter. The hemispheres are connected by a transverse commissure of nerve fibers, the *corpus callosum.* The surface of the hemispheres is raised into irregular ridges called *gyri* or convolutions, separated by *fissures* and *sulci.* Each hemisphere contains a cavity or *ventricle* (the *lateral ventricles,* or the first and second ventricles of the brain). The cerebrum and certain adjacent parts constitute the prosencephalon, or first division of the brain. On account of the great development of the human brain, they overlap and conceal the upper or dorsal surface of the next two divisions, and partly also the fourth. The second division, or thalamencephalon, has a *median* cavity, the *third ventricle,* which communicates with each lateral ventricle by an opening, the *foramen of Munro.* Each side of the third ventricle are oblong masses of gray matter, the *optic thalami.* The pineal gland is attached to this part of the brain. See PINEAL GLAND. The third ventricle opens posteriorly into a short canal, the *aqueduct of Sylvius.* The structures surrounding the aqueduct constitute the third division of the brain, or **mesencephalon,** whose ventral portion is formed largely of two large bundles of nerve fibers, the *crura cerebri,* which connect the cerebral hemispheres directly with the medulla oblongata (see below) and spinal cord. Its dorsal surface has four eminences, the *corpora quadrigemina.* (In many vertebrates these are only two in number and are often called the *optic lobes.*) The fourth division, the epencephalon, includes the *cerebellum,* a large mass of gray and white matter lying beneath the posterior part of the cerebral hemispheres, and the *pons Varolii,* another great commissure or mass of transverse fibers, which lies on the lower or ventral surface of the brain. The fifth division, or **metencephalon,** consists of the medulla oblongata, directly continuous with, and resembling an enlarged part of, the spinal cord. Its cavity, continuous with the aqueduct of Sylvius and with the central canal of the spinal cord, is called the *fourth ventricle.*

In the higher mammals the cerebrum, though much smaller than in man, is relatively larger than in the lower forms. The complexity of the convolutions depends as well on the size of the animal as on the grade of its intelligence. In the lowest mammals the corpus callosum is rudimentary or wanting. It is not found in other classes. Birds have smooth cerebral hemispheres and very large optic lobes. In the lowest vertebrate, Amphioxus, there is no distinct brain, but in many invertebrates, as in the arthropods, there are

large ganglia (see CEREBRAL GANGLION) corresponding to it in part, both in position and function, and often called the brain. The brain of man is actually larger than that of any other animal, however large, except the elephants and large whales. Vertebrates of past geological periods had as a rule very small brains, compared to their living representatives. In some of the gigantic dinosaurs the brain was much smaller than the lumbar enlargement of the spinal cord. For the development of the brain, see NERVOUS SYSTEM.

The cerebrum, or, more narrowly, the gray matter of the cerebrum, is usually regarded as the seat of CONSCIOUSNESS. Permanent alterations or injuries in this region are accompanied by alterations in conscious life, and while it is unlikely that every physiological brain change in this region is accompanied by a change in consciousness, it is believed that all such changes eventually affect conscious states. Reflex and other involuntary actions may continue after the destruction of the brain, but the organ is essential to all voluntary activity. That the brain is the bodily organ most directly associated with consciousness has been recognized more or less clearly since the time of Hippocrates and Plato, but it is only in modern times that advance has been made toward a definite analysis of the functions of its different parts. This was attempted early in the 19th century by the phrenologists (see PHRENOLOGY), though on an erroneous basis and with erroneous results. Phrenology, however, served as an incentive to the scientific investigations which have led to the doctrine of **cerebral localization**, viz., that different areas of the cerebral cortex are ultimately connected with different functions of consciousness. Only a few of these cortical centers have been positively determined, though many are approximately certain. It is probable, however, that localization varies somewhat in individuals, and in cases of injury there is evidence of *substitution*, that is, the taking over of the function of the injured area by another area. For the chief areas whose functions have been determined or inferred, see *Illust.*

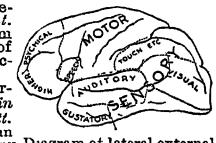

Diagram of lateral external surface of the Cerebrum, showing localization of functions.

The function of the cerebellum is supposed to be regulation of various reflex and instinctive actions.

Bran (brăn), *n.* [Cf. W. & Ir. *bran* raven.] *Celt. Myth.* An ancient British god of the underworld, said to have been a British king (cf. BRENNIUS). According to the Welsh legend, he gave in marriage his sister, *Branwen*, to the king of Ireland. Abuse of her caused Bran to attack and destroy the Irish, but he was poisoned by a dart in the fight and commanded his seven surviving followers to behead him. For eighty-seven years his head conversed uncorrupted, but upon the opening of a forbidden door its conversation ceased, and the seven hastened to bury it on Tower Hill, London, as Bran had bidden. There it remained until dug up by King Arthur, whereupon ensued the disastrous invasions of the Saxon barbarians.

Syn. — BRAVERY, BRAVADO, BRAVURA. BRAVERY, earlier equivalent to *bravado*, stands in modern usage for the quality (see COURAGE) of which *bravado* is the affectation or pretense. BRAVADO may be ostentatious and defiant; it may also serve merely as a shift to cover conscious lack of courage; as, "I . . . maintained as good a countenance in the midst of my perplexities as a man need desire. It is not *bravado*; I literally feel myself strong and resolute" (*Scott*). BRAVURA connotes spirit, brilliancy, or dash of execution; as, "This burning of Habelschwert by way of mere *bravura*" (*Carlyle*); but it is commonly confined to its technical musical sense (see def.), which is sometimes applied, by transfer, to other than musical composition; as, "That careless fling of the voice, that happy rapture, that *bravura*, which makes the listener's heart go near to burst with . . . joy" (*M. Hewlett*); "Occasionally he writes in simplicity as well as sincerity, without labored linguistic *bravuras*" (*The Nation*).

An article of food made from flour or meal by moistening, kneading, and baking. Previous to baking the dough is usually treated in some way to render it light and porous, as by mixing it with yeast or leaven or baking powder, by moistening with carbonated water (giving **aërated bread**), or even by beating it so as to inclose bubbles of air. The yeast or leaven sets up fermentation, giving off the gas carbon dioxide, which inflates, or "raises," the dough; the same gas is generated by the interaction of the acid and the carbonate in baking powder or of sour milk and soda, or escapes from the carbonated water. In **salt-rising bread** fermentation is set up by germs from the air, the salt preventing undesirable processes.

brew'ing, *n.* **1.** Act or process of preparing liquors which are brewed, as beer and ale. The customary operations of brewing comprise: (1) Malting, often performed in separate establishments. (2) Mashing (see MASH, *v. t.*). (3) Boiling the wort, with the addition of hops. (4) Cooling the wort. (5) Fermentation, conducted in large oak butts, and started by the addition of yeast. In *bottom fermentation* the temperature is kept low (5°–8° C.), the action continues for a week or ten days, and the yeast finally settles to the bottom. The liquor is then drawn off and stored for several months, during which it undergoes a slow after fermentation. This is the method used for lager beers. In *top fermentation* the liquid is kept at 15°–18° C., the action proceeds rapidly to completion (in 3–5 days), and most of the yeast rises to the top and is removed by skimming or otherwise. The liquor is soon ready for the market. This is the common method in Great Britain, and is practiced in the United States for ales, etc. (6) Clarification, as with isinglass. (7) Bottling and barreling. See BEER, YEAST.

2. The quantity brewed at once.

A *brewing* of new beer, set by old beer. *Bacon.*

3. A mixing together; concoction.

F. dial. *brique* piece, AS. *brice* breaking, fragment; prob of G. or D. origin, and akin to E. *break.*] **1.** A building and paving material made from clay (either pure or mixed, as with sand, lime, etc) by molding into blocks while moist and hardening it in the sun or by fire. Sun-dried brick, used extensively in ancient times, and still made in warm countries, is much less durable than baked or burned brick. (See CLAY.) Brick is burned either in a kiln or in stacks or "clamps." The ordinary red color is due to the presence of iron compounds which are converted into the red oxide. This color may be altered to a greenish blue by a heat high enough to vitrify the surface, or into brown or yellow by mixing lime or magnesia with the clay.

2. An individual molded block of the above material, usually rectangular. The average dimensions of an English brick may be taken as $2\frac{1}{2} \times 4\frac{1}{2} \times 9$ inches; of an American brick, $2\frac{1}{2} \times 4 \times 8$ inches.

brit'tle (brĭt'l), *a.* [ME. *britel, brutel,* fr. AS. *brēotan* to break; akin to Icel. *brytja, brjōta,* Sw. *bryta,* Dan. *bryde.*] **1.** Easily broken; apt to break; fragile; not tough or tenacious.

Farewell, thou pretty, *brittle* piece
Of fine-cut crystal. *Cotton.*

2. Hence, frail; unstable; inconstant; as, *brittle* honor.

Syn. — Frangible, breakable; weak, feeble, infirm, slight. — BRITTLE, FRAGILE, FRAIL. BRITTLE has special reference to substances, which it characterizes as easily fractured or snapped; as, *brittle* as an eggshell or a glass rod. FRAGILE has wider range than *brittle* (thus, spun glass is both *brittle* and *fragile;* a spider's web is a *fragile,* but not a *brittle,* structure), and applies esp. to objects which are easily broken or destroyed, or are of delicate constitution; as, a *fragile* vase, *fragile* as a flower. FRAIL and *fragile* are frequently convertible, but *frail* usually carries a stronger implication of weakness or inadequacy for a given purpose, and applies esp. to moral infirmity; as, to shoot the rapids in a *frail* canoe; "any taint of vice whose strong corruption inhabits our *frail* blood" (*Shak.*); "a child of the *frail* Abbess of Leominster" (*E. A. Freeman*).

2. *pl.* Trousers; hose. *Obs.*
3. A dialect pronunciation; esp., a strongly marked dialectal accent such as characterizes the Irish pronunciation of English. In the 18th century citations it is frequently said of an Irishman that he "has a *brogue* on his tongue."
Aum. Altering your language won't do, sir, this fellow knows your person, and will swear to your face.
Fog. Faash! Fey, is dere *brogue* upon my faash too? *Farquhar.*
Though the phrase "to speak with the *brogue* on the tongue" does not occur until 1729, yet this phrase is implied in the 1707 extract from Farquhar. It will be observed, too, that an Irishman seems to an Englishman to speak "thick." Is it unreasonable to conclude that "speaking with the *brogue* on the tongue" is equivalent to "speaking with an Irish shoe on the tongue," that is, "speaking thick, as Irishmen do"? *Albert Matthews.*

This and other species yield a valuable fiber. See pinguin.

Bro-me'li-a'ce-æ (-ā'sē-ē), *n. pl.* [NL.] *Bot.* A large family of monocotyledonous plants, natives chiefly of tropical America, containing about 40 genera and 900 species, among which are *Bromelia*, *Ananas*, *Tillandsia*, and *Pitcairnea*. They are epiphytic or terrestrial herbs, with regular and perfect bracteate flowers, and basal, often spiny, leaves. Many are ornamental greenhouse plants. — **bro-me'li-a'ceous** (-shŭs), *a.*

bro'me-lin (brō'mē-lĭn), *n.* [From *Bromelia*, former generic name of the pineapple.] *Physiol. Chem.* A proteolytic enzyme present in the juice of the pineapple.

brom'eth'yl-ene (brōm'ĕth'ĭ-lēn), *n.* *Chem.* A bromine derivative of ethylene; specif., vinyl bromide, $CH_2{:}CHBr$.

brom'hy'drin (-hī'drĭn), *n.* *Chem.* Any of a class of compounds similar to the chlorhydrins, but containing bromine in place of chlorine.

Bro'mi-an (brō'mĭ-ăn), *a.* [L. *Bromius*, fr. Gr. Βρόμιος.] Of or pertaining to Bromios, or Dionysus (which see). — *n.* Bromian drink, wine.

bro'mic (brō'mĭk), *a.* *Chem.* Of, pertaining to, or containing, bromine; — said esp. of those compounds in which this element has a valence of five, as, *bromic* acid, $HBrO_3$, an acid similar to chloric acid.

bro'mide (brō'mīd, -mĭd; 184, 277), *n.* Also **-mid**. *Chem.* A binary compound of bromine with another element or a radical; a salt or ester of hydrobromic acid; as, potassium *bromide*; ethyl *bromide*. The bromides constitute an important class, several being used in medicine or the arts. See potassium bromide, silver bromide, etc.

bromide, *or* **bromid, paper**. *Photog.* A sensitized paper coated with gelatin impregnated with bromide of silver, used in contact printing and in making enlargements.

bro'mid-i'on (brō'mĭd-ī'ŏn), *n.* *Chem.* Ionic bromine, Br^-, present in aqueous solutions of bromides. See ion.

bro'mi-nate (brō'mĭ-nāt), *v. t.* *Chem.* To subject to the action of bromine, esp. so as to cause substitution of bromine for hydrogen; to bromate. — **bro'mi-na'tion** (-nā'shŭn), *n.*

bro'mine (brō'mĭn; -mēn; 184), *n.* Also **bro'min** [Gr. *βρῶμος* bad smell, stink.] *Chem.* One of the elements, which is, at ordinary temperatures, a deep reddish brown caustic liquid of a very disagreeable odor, and emits a brownish vapor. Symbol, *Br*; at. wt., 79.916. It occurs in nature only in combination, being found in minute quantities in sea water, in many saline springs, in salt deposits, and also in the mineral bromyrite. Free bromine is commonly prepared by the action of chlorine on bromides. Its sp. gr. is 3.188 at 0°, it boils at 63° C. (145.4° F.) and solidifies at −7° C. (19° F.). It closely resembles chlorine chemically. Bromine is used in the manufacture of dyes, in medicine, in chemical operations, and as a disinfectant.

bro'mism (brō'mĭz'm), *n.* *Med* A diseased condition produced by the excessive use of bromine or its compounds. It is characterized by mental dullness, muscular weakness, and an eruption upon the skin.

bro'mize (brō'mīz), *v. t.* To treat with bromine or a bromide, as a photographic plate. — **bro'miz-er** (-mīz-ẽr), *n.*

brom'lite (brŏm'līt), *n.* [From *Bromley* Hill, near Alston, Cumberland, Eng.] A mineral, $(Ba,Ca)CO_3$, intermediate between witherite and strontianite; — called also *alstonite*.

bro'mo- (brō'mō-), **brom-**. *Chem.* Combining form indicating *bromine* as an ingredient, as, *bromoform*. See chloro-.

bro'mo-ben'zene (-bĕn'zēn; -bĕn-zēn'), *n.* *Org. Chem.* Any bromine derivative of benzene, produced by direct bromination or by some other method; specif., the mono derivative, C_6H_5Br, a colorless oily liquid.

bro'mo-form (brō'mō-fôrm), *n.* [*bromo-* + *formyl*.] *Chem.* A colorless liquid, $CHBr_3$, having an agreeable odor and sweetish taste, and resembling chloroform in its effects. In composition it is the same as chloroform with the substitution of bromine for chlorine.

bro'mo-gel'a-tin (-jĕl'ȧ-tĭn), *a.* [*bromo-* + *gelatin*.] *Photog.* Designating, or pertaining to, a process of preparing dry plates with an emulsion of bromides and silver nitrate in gelatin.

bro'mo-i'o-dism (-ī'ō-dĭz'm), *n.* [*bromo-* + *iodine* + *-ism*.] *Med.* Poisoning induced by large doses of bromine and iodine or of their compounds.

bro'mo-i'o-dized (-dīzd), *a.* *Photog.* Treated with bromides and iodides.

bro'mol (brō'mōl; -mŏl), *n.* [Abbr. fr. tri*bromophenol*.] *Pharm.* A crystalline substance (chemically, tribromophenol, $C_6H_3Br_3OH$), used as an antiseptic and disinfectant.

bro'mo-pi'crin (brō'mō-pī'krĭn; -pĭk'rĭn), *n.* Also **brom'-pi'crin**, and **-pi'krin** (brŏm'-). [G. *brompikrin*; *brom* bromine + *pikrinsäure* picric acid.] *Chem.* A pungent colorless explosive liquid, CNO_2Br_3, analogous to and resembling chloropicrin.

Bromp'ton stock (brŏmp't'n). [From *Brompton*, England.] A tall garden biennial or perennial of the mustard family (*Matthiola incana*) having white or purple single or double flowers in a terminal raceme. It is distinguished from the *ten-weeks stock* by its autumn-blooming habit.

Bro'mus (brō'mŭs), *n.* [NL., fr. L. *bromos*, Gr. *βρόμος*, a kind of oats.] *Bot.* A large genus of grasses, the brome grasses, natives of temperate regions. They are distinguished by the large, mostly drooping spikelets, the scales of which are usually awned. See brome grass.

brom'vo'gel (brŏm'fō'gĕl), *n.* [D. *brommen* to buzz, drone + *vogel* bird.] A South African hornbill (*Bucorvus cafer*) of large size and more or less terrestrial habits.

bro'my-rite (brō'mĭ-rīt), *n.* [*bromine* + Gr. *ἄργυρος* silver.] *Min.* Native silver bromide, AgBr, yellow in color; — called also *bromargyrite*.

An Image of Buddha.

In reading the Pali Scriptures one is impressed with the strong personal influence exercised by the *Buddha* over the hearts of his followers. He was regarded, not as a mere formulator of dry metaphysical propositions, but as a very wise and compassionate friend of his fellow men. He was full of tact, and all his ways were ways of peace. *Henry Clarke Warren.*

Bud'dhism (bōōd'ĭz'm; 277), *n.* The religion based upon the doctrine originally taught by the Hindu sage Gautama Siddartha, surnamed Buddha, "the awakened or enlightened," in the 6th century B. C., and adopted by a large part of the inhabitants of central and eastern Asia and the Indian islands. Buddha's teaching is believed to have been atheistic. It presents release from existence (a beatific enfranchisement, *Nirvana*) as the greatest good. Nirvana is only to be attained by escape from the causal nexus, or *Karma*, whereby the unenlightened are doomed to endless rebirths (see TRANSMIGRATION). Buddha's "Four Truths" are: (1) that life is sorrow; (2) that the cham of reincarnation results from desire; (3) that the only escape is through annihilation of desire; (4) that the way of escape is the "Eightfold Path" of right belief, right resolve, right word, right act, right life, right effort, right thinking, right meditation. Buddha denied the special virtue of caste, ritualism, and asceticism, and insisted upon the necessity of pity, kindliness, and patience, for salvation.

4. A rookery, or a flock of rooks. *Obs.*

Syn. — BUILDING, EDIFICE, STRUCTURE agree in meaning, but differ slightly in application. BUILDING is the common, and in most cases the adequate, term; as, "the *buildings* of the temple" (*Matt.* xxiv. 1). EDIFICE usually applies to large and elegant buildings only; as, "Should I go to church, and see the holy *edifice* of stone" (*Shak.*). STRUCTURE retains more frequently than the others the sense of something constructed, often in a particular way; as, a tumble-down *structure,* a modern steel *structure.* Like *edifice, structure* is often used of buildings of some size or magnificence; as, "many a towered *structure* high" (*Milton*).

building and loan association, *Law,* a society, generally incorporated, organized to afford a safe investment for savings, and to aid its members in building houses or other edifices, or buying land, esp. for improvement. It does business by the collection of dues or assessments, usually paid in small sums, from its members, and lending the fund so collected on mortgage to its members, usually to the one willing to pay the largest premium, making the interest and principal payable in small payments. Under this general name are usually included variously designated organizations having similar purposes and methods, such as *mutual loan associations, homestead and benefit associations, cooperative banks, building societies, benefit societies,* etc. In the United States the so-called *national* and *local* associations differ chiefly in the fact that the former do an interstate business which is within the jurisdiction of the Federal courts. — **b. block. a** A support for a ship's keel during construction. **b** A child's toy block. — **b. iron,** a tool for melting and adding wax in the preparation of an electrotype mold. — **b. lease,** *Law,* a lease of land made wholly or in part in consideration of the erection, repair, or execution by the lessee, of some building or improvement in connection with building purposes on the land leased, other rent being often merely nominal. — **b. paper,** heavy paper used in walls and roofs either to give warmth or to deaden sound. — **building slip,** the inclined structure on which a vessel is built. See SLIP, *n.*

Bur'i-dan's ass (bûr'Ĭ-dănz). A famous problem discussed by the Schoolmen, the authorship of which has been attributed (probably erroneously) to Jean Buridan (d. after 1358). It supposes a hungry ass placed equidistant from two bundles of hay, or, in another form, an ass equally hungry and thirsty placed equidistant from a measure of oats and a bucket of water. Some argued that he would die from inability of the will to act between two equally powerful motives ; others that rather than die he would make a choice, thus exercising free will.
